Sl no	Details of works	Unit	Quantity	Rate in words and figures	Amount in words and figures
1	<p>Providing and fixing expansion joint for 150mm wide expansion gap at internal floor. The system is proprietary design consisting of aluminum profiles with turn bar mechanism. The expansion joint includes aluminum frame, slide plate and turn bar for floor to floor condition. The system operates with turn bar mechanism allowing thermal and multi directional seismic movement. The centre plate remains flush during thermal movement and while seismic movement the centre plate displaces temporarily and slides over the floor. The system should be fixed with appropriate anchors, fasteners and the exposed surface shall be mill finish as standard. It should be capable of withstanding load of wheel chair &amp; stretcher loads. Aluminum to conform as per ASTM B221 for extrusion alloy 6063-T5/T6, all as per direction of the Engineer in charge.</p>				
	Floor to floor	Meter	120.00		
	Floor to wall	Meter	57.00		

2	<p>Providing and fixing for 150mm gap expansion joint at external wall. The system is proprietary design consisting of aluminum profiles. The expansion joint includes aluminum clip, aluminum cover plate and supporting isolated gasket for wall to wall condition. The cover plate snaps into the clip provided with isolated gasket on cover edges for better fitment on the wall with no slipping down tendency. The system should be fixed with appropriate anchors and fasteners and the exposed surface match the adjacent finishes. Aluminum to conform as per ASTM B221 for extrusion alloy 6063-T5/T6 and contain PVC reinforced moisture barrier for maintaining water tightness, all as per direction of the Engineer in charge.</p>				
	wall to wall	Meter	20.00		
	Wall to corner wall	Meter	85.00		
3	<p>Providing and fixing expansion joint for 150mm wide gap at internal wall. The system is proprietary design consisting of aluminum profiles. The expansion joint includes aluminum clip, aluminum cover plate and supporting isolated gasket for wall to wall condition. The cover plate snaps into the clip provided with isolated gasket on cover edges for better fitment on the wall with no slipping down tendency. The system should be fixed with appropriate anchors</p>				

	and fasteners and the exposed surface match the adjacent finishes. Aluminum to conform as per ASTM B221 for extrusion alloy 6063-T5, all as per direction of the Engineer in charge.				
	wall to wall	Meter	225.00
