- (xxiv) “INCOTERMS” means International Commercial Terms as on the date of Tender Opening
- (xxv) “RT” means Re-Tender
- (xxvi) “CAMC” Comprehensive Annual Maintenance Contract

## **2. Introduction**

- 2.1 The Purchaser has issued these TE documents for purchase of goods and related services as mentioned in Section – V and VI – “List of Requirements” and “Technical Specifications”.
- 2.2 This section (Section II - “General Instruction Tenderers”) provides the relevant information as well as instructions to assist the prospective tenderers in preparation and submission of tenders. It also includes the mode and procedure to be adopted by the purchaser for receipt and opening as well as scrutiny and evaluation of tenders and subsequent placement of contract.
- 2.3 Before formulating the tender and submitting the same to the purchaser, the tenderer should read and examine all the terms, conditions, instructions, checklist etc. contained in the TE documents. Failure to provide and/or comply with the required information, instructions etc. incorporated in these TE documents may result in rejection of its tender.

## **3. Availability of funds**

Deleted.

## **4. Language of Tender**

- 4.1 The tender submitted by the tenderer and all subsequent correspondence and documents relating to the tender exchanged between the tenderer and the purchaser, shall be written in the English/Hindi language, unless otherwise specified in the Tender Enquiry. However, the language of any printed literature furnished by the tenderer in

connection with its tender may be written in any other language provided the same is accompanied by an English translation and, for purposes of interpretation of the tender, the English translation shall prevail.

- 4.2 The tender submitted by the tenderer and all subsequent correspondence and documents relating to the tender exchanged between the tenderer and the purchaser, may also be written in the Hindi language, provided that the same are accompanied by English translation, in which case, for purpose of interpretation of the tender etc, the English translations shall prevail

## **5. Eligible Tenderers**

- 5.1 This invitation for tenders is open to all suppliers who fulfil the eligibility criteria specified in these documents.

## **6. Eligible Goods and Services**

- 6.1 All goods and related services to be supplied under the contract shall have their origin in India or any other country with which India has not banned trade relations. The term “origin” used in this clause means the place where the goods are manufactured or from where the related services are arranged and supplied.

## **7. Tendering Expense**

- 7.1 The tenderer shall bear all costs and expenditure incurred and/or to be incurred by it in connection with its tender including preparation, mailing and submission of its tender and for subsequent processing the same. The purchaser will, in no case be responsible or liable for any such cost, expenditure etc regardless of the conduct or outcome of the tendering process.

# **B. TENDER DOCUMENTS**

## **8. Content of Tender Documents**

- 8.1 In addition to Section I – “Notice inviting Tender” (NIT), the Tender documents include:
- Section II – General Instructions to Tenderers (GIT)
  - Section III – General Conditions of Contract (GCC)
  - Section IV – Special Conditions of Contract (SCC)
  - Section V – List of Requirements
  - Section VI – Technical Specifications
  - Section VII – Quality Control Requirements
  - Section VIII – Qualification Criteria
  - Section IX – Tender Form for Technical Bid
  - Section IX B – Tender Form for Price Bid
  - Section X – Price Schedules
  - Section XI – Bank Guarantee Form for EMD
  - Section XII – Bank Guarantee Form for Performance Security/CAMC Security
  - Section XIII – Manufacturer’s/Distributor’s Authorisation Form
  - Section XIV – Contract Form ‘A’
  - Section XV – Contract Form ‘B’
  - Section XVI – Proforma of Consignee Receipt Certificate

- Section XVII – Proforma of Final Acceptance Certificate by the consignee
- Section XVIII – Consignee List
- Section XIX - Check List

8.2 The relevant details of the required goods and services, the terms, conditions and procedure for tendering, tender evaluation, placement of contract, the applicable contract terms and, also, the standard formats to be used for this purpose are incorporated in the above-mentioned documents. The interested tenderers are expected to examine all such details etc to proceed further.

## 9. Amendments to Tender documents

- 9.1 At any time prior to the deadline for submission of tenders, the purchaser may, for any reason deemed fit by it, modify the TE documents by issuing suitable amendment(s) to it.
- 9.2 Such an amendment will be notified in Purchaser's Website [www.lifecarehll.com](http://www.lifecarehll.com) and also in writing by registered/speed post or by e-mail, to all prospective tenderers, which have received the TE documents and will be binding on them.
- 9.3 In order to provide reasonable time to the prospective tenderers to take necessary action in preparing their tenders as per the amendment, the purchaser may, at its discretion extend the deadline for the submission of tenders and other allied time frames, which are linked with that deadline.

## 10. Clarification of Tender documents

- 10.1 A tenderer requiring any clarification or elucidation on any issue of the TE documents may take up the same with the purchaser in writing. The purchaser will respond in writing to such request provided the same is received by the purchaser not later than 5 days prior to the prescribed date of submission of tender.

## C. PREPARATION OF TENDERS

### 11. Documents Comprising the Tender

- 11.1 The **Two bid System**, i.e. "Techno-Commercial Tender" and "Price Tender" prepared by the tenderer shall comprise the following:

#### A) **Techno-Commercial Tender (Un priced Tender)**

- i) Earnest money furnished in accordance with GIT clause 19.1
- ii) Tender Form as per Section IX (**Un priced**).
- iii) Documentary evidence, as necessary in terms of clauses GIT Clause 5 and 17 establishing that the tenderer is eligible to submit the tender and, also, qualified to perform the contract if its tender is accepted.
- iv) Tenderer/Agent who quotes for goods manufactured by other manufacturer shall furnish Manufacturer's/ Distributor's Authorisation Form/Consortium as per the format in Section XIII.
- v) Power of Attorney in favour of signatory of TE documents and signatory of Manufacturer's/Distributor's Authorisation Form.
- vi) Documents and relevant details to establish in accordance with GIT clause 18 that the goods and the allied services to be supplied by the tenderer conform to the requirement of the TE documents.

- vii) Performance Statement as per section XVII along with relevant copies of orders and end users' satisfaction certificate.
- viii) Price Schedule(s) as per Section X filled up with all the details including Make, Model etc. of the goods offered with prices blank (**without indicating any prices**).
- ix) Certificate of Incorporation in the country of origin.
- x) Checklist as per Section XIX.
- xi) Technical Compliance Statement (specification points-wise) along with pamphlets/Catalogue.

**B) Price Tender:**

The information given at clause no. 11.1 A) ii) & viii) above should be reproduced with the prices indicated.

**N.B.**

All pages of the Tender should be page numbered and indexed.  
It is the responsibility of tenderer to go through the TE document to ensure furnishing all required documents in addition to above, if any.

- 11.2 The authorized signatory of the tenderer must sign the tender duly stamped at appropriate places and initial all the remaining pages of the tender.
- 11.3 A tender, which does not fulfil any of the above requirements and/or gives evasive information/reply against any such requirement, shall be liable to be ignored and rejected.
- 11.4 Tender sent by fax/telex/cable/electronically shall be ignored.

**12. Tender currencies**

- 12.1 The tenderer shall quote only in Indian Rupees.

Tenders, where prices are quoted in any other currency shall be treated as non -responsive and rejected.

**13 Tender Prices**

- 13.1 The Tenderer shall indicate on the Price Schedule provided under Section X all the specified components of prices shown therein including the unit prices and total tender prices of the goods and services. All the columns shown in the price schedule should be filled up as required. If any column doesn't apply to a tender, same should be clarified as "NA" by the tenderer.
- 13.2 Deleted.
- 13.3 While filling up the columns of the Price Schedule, the following aspects should be noted for compliance:
  - a) GST which will be payable on the goods shall be indicated in the SECTION X (a). in absence of GST, it will be treated as inclusive.
  - b) Charges towards Packing & Forwarding, Inland Transportation, Insurance (local transportation and storage) would be borne by the supplier from ware house to the consignee site for a period including 3 months beyond date of delivery, Loading/Unloading, Positioning and other local costs incidental to delivery of the goods to their final destination as specified in Price Schedule;

- c) The price of Incidental Services, as mentioned in Section V & VI, Price Schedule and GCC shall be considered;
- d) The price of CAMC including all taxes and duties, as mentioned in GCC, SCC, List of Equipments, Technical Specification and Price Schedule shall be considered.

**13.4 Additional information and instruction on GST:**

13.4.1 The price will be taken inclusive of GST and no claim for the same will be entertained later.

- 13.5 For transportation of imported goods offered from abroad, relevant instructions as incorporated under GCC Clause 10 shall be followed.
- 13.6 For insurance of goods to be supplied, relevant instructions as provided under GCC Clause 11 shall be followed.
- 13.7 The need for indication of all such price components by the tenderers, as required in this clause (viz., GIT clause 13) is for the purpose of comparison of the tenders by the purchaser and will no way restrict the purchaser's right to award the contract on the selected tenderer on any of the terms offered.

**14. Indian Agent**

- 14.1 If a foreign tenderer, the tenderer should have engaged an agent in India in connection with its tender and shall furnish the following information:
  - a) The complete name, address, contact person and contact number of the Indian Agent(s)/service centres and its permanent income tax account number as allotted by the Indian Income Tax authority.
  - b) The details of the services to be rendered by the agent for the subject requirement.
  - c) Details of Service outlets in India, nearest to the consignee(s), to render services during Warranty and CAMC period.

**15. Firm Price**

- 15.1 Unless otherwise specified, prices quoted by the tenderer shall remain firm and fixed during the currency of the contract and not subject to variation on any account.
- 15.2 However, as regards taxes and duties, if any, chargeable on the goods and payable, the conditions stipulated in GIT clause 13 will apply.

**16. Alternative Tenders**

- 16.1 Alternative Tenders are not permitted.

**17 Documents Establishing Tenderer's Eligibility and Qualifications**

- 17.1 Pursuant to GIT clause 11, the tenderer shall furnish, as part of its tender, relevant details and documents establishing its eligibility to quote and its qualifications to perform the contract if its tender is accepted.
- 17.2 The documentary evidence needed to establish the tenderer's qualifications shall fulfil the following requirements:

- a) In case the tenderer offers to supply goods, which are manufactured by some other firm, the tenderer has been duly authorised by the goods manufacturer to quote for and supply the goods to the purchaser. The tenderer shall submit the manufacturer's/Distributor's authorization letter /consortium to this effect as per the standard form provided under Section XIV in this document.
- b) The tenderer has the required financial, technical and production capability necessary to perform the contract and, further, it meets the qualification criteria incorporated in the Section VIII in these documents.
- c) In case the tenderer is not doing business in India, it is duly represented by an agent stationed in India fully equipped and able to carry out the required contractual functions and duties of the supplier including payment of duties, taxes, levies, clearance of goods, freight, transport, insurance after sale service, maintenance & repair etc. of the goods in question, stocking of spare parts and fast moving components and other obligations, if any, specified in the conditions of contract and/or technical specifications.
- d) The tenderer shall quote for all items in the list of requirements, if any of the item not quoted then their bid will be treated as non responsive.
- e) The items quoted shall be responsive to the requirements in the List of Equipments in the Tender.

## **18. Documents establishing Good's Conformity to Tender document.**

- 18.1 The tenderer shall provide in its tender the required as well as the relevant documents like technical data, literature, drawings etc. to establish that the goods and services offered in the tender fully conform to the goods and services specified by the purchaser in the Tender documents. For this purpose the tenderer shall also provide a clause-by-clause commentary on the technical specifications and other technical details incorporated by the purchaser in the Tender documents to establish technical responsiveness of the goods and services offered in its tender.
- 18.2 In case there is any variation and/or deviation between the goods & services prescribed by the purchaser and that offered by the tenderer, the tenderer shall list out the same in a chart form without ambiguity and provide the same along with its tender.
- 18.3 If a tenderer furnishes wrong and/or misleading data, statement(s) etc. about technical acceptability of the goods and services offered by it, its tender will be liable to be ignored and rejected in addition to other remedies available to the purchaser in this regard.

## **19. Earnest Money Deposit (EMD)**

19.1

<b>Sl No</b>	<b>Description</b>	<b>Tender Fee In Rs.</b>	<b>EMD amount in Rs.</b>
1	Setting up of PICU on Turnkey basis	5,000.00	7,00,000.00

Earnest Money shall be in the form of a Demand Draft from a nationalised bank issued in favour of HLL Lifecare Limited, Thiruvananthapuram, or in the form of an irrevocable Bank guarantee of any Nationalised Bank, which should be placed in a separate sealed cover marked "Earnest Money" and shall be submitted along with the tenders.

- 19.2 The earnest money shall be in Indian Rupees.
- 19.3 The earnest money in the form of BG shall be valid for a period of forty five (45) days beyond the validity period of the tender. As validity period of Tender as per Clause 20 of GIT is 120 days, the EMD shall be valid for 165 days from Techno – Commercial Tender opening date.
- 19.4 Unsuccessful tenderers' earnest money will be returned to them without any interest, not later than thirty days after conclusion of the resultant contract. Successful tenderer's earnest money will be returned without any interest, after receipt of performance security from that tenderer.
- 19.5 Earnest Money is required to protect the purchaser against the risk of the Tenderer's conduct, which would warrant the forfeiture of the EMD. Earnest money of a tenderer will be forfeited, if the tenderer withdraws or amends its tender or impairs or derogates from the tender in any respect within the period of validity of its tender or if it comes to notice that the information/documents furnished in its tender is incorrect, false, misleading or forged without prejudice to other rights of the purchaser. The successful tenderer's earnest money will be forfeited without prejudice to other rights of Purchaser if it fails to furnish the required performance security within the specified period.

## **20. Tender Validity**

- 20.1 If not mentioned otherwise, the tenders shall remain valid for acceptance for a period of 120 days after the date of tender opening prescribed in the Tender document. Any tender valid for a shorter period shall be treated as unresponsive and rejected.
- 20.2 In exceptional cases, the tenderers may be requested by the purchaser to extend the validity of their tenders up to a specified period. Such request(s) and responses thereto shall be conveyed by e-mail or by surface mail. The tenderers, who agree to extend the tender validity, are to extend the same without any change or modification of their original tender and they are also to extend the validity period of the EMD accordingly.
- 20.3 In case the day up to which the tenders are to remain valid falls on/ subsequently declared a holiday or closed day for the purchaser, the tender validity shall automatically be extended up to the next working day.

## **21. Signing and Sealing of Tender**

- 21.1 The tenderers shall submit their tenders as per the instructions contained in GIT Clause 11
- 21.2 The original of the tender shall either be typed or written in indelible ink and the same shall be signed by the tenderer or by a person(s) who has been duly authorized to bind the tenderer to the contract. The letter of authorization shall be by a written and notarised power of attorney executed on non judicial stamp paper of Rs.300/-, which shall also be furnished along with the tender.
- 21.3 All the copies of the tender shall be duly signed at the appropriate places as indicated in the Tender documents and all other pages of the tender including printed literature, if any shall be initialled by the same person(s) signing the tender. The tender shall not

contain any erasure or overwriting, except as necessary to correct any error made by the tenderer and, if there is any such correction; the same shall be initialled by the person(s) signing the tender.

- 21.4 The tenderer is to seal the tender in envelopes, and write the address of the purchaser and the tender reference number on the envelopes. The sentence “NOT TO BE OPENED” before 23.04.2019, 15.00 Hrs (The tenderer is to put the date & time of tender opening) are to be written on these envelopes. The inner envelopes are then to be put in a bigger outer envelope, which will also be duly sealed, marked etc. as above. If the outer envelope is not sealed and marked properly as above, the purchaser will not assume any responsibility for its misplacement, premature opening, late opening etc.
- 21.5 Tender document seeks quotation following **Two Bid System**, in two parts. First part will be known as **‘Techno - Commercial Tender’**, and the second part **‘Price Tender’** as specified in clause 11 of GIT. Tenderer shall seal **‘Techno - Commercial Tender’** and **‘Price Tender’** separately and covers will be suitably super scribed. Both these sealed covers shall be put in a bigger cover and sealed.

## **D. SUBMISSION OF TENDERS**

### **22. Submission of Tenders**

- 22.1 Tenders shall be submitted to HLL Lifecare Ltd., by hand or through registered post or courier service at the address given below and not later than 14.00 Hrs on 23.04.2019. In respect of Applications received by post or courier, HLL shall not assume any responsibility for any delayed delivery. Documents submitted in connection with this tender will be treated confidential.

The Tenders should be addressed to:

**General Manager (Materials),  
HLL Lifecare Limited (A Govt. of India Enterprise)  
Akkulam Factory, Sreekariam P.O.  
Thiruvananthapuram – 17  
Kerala, India.**

- 22.3 Purchaser may at its discretion, extend the deadline for the submission of Tender, in which case all rights and obligations of Purchaser and the Tenderer subject to the previous deadline shall thereafter be subject to the deadline as extended.

### **23. Late Tender**

- 23.1 A tender, which is received after the specified date and time for receipt of tenders will be treated as “late” tender and will be ignored.

### **24. Alteration and Withdrawal of Tender**

- 24.1 The tenderer, after submitting its tender, is permitted to withdraw/alter/modify its tender so long as such withdrawal/alterations /modifications are received duly signed, sealed and marked like the original tender, within the deadline for submission of tenders. Alterations / modifications to tenders received after the prescribed deadline will not be considered.

- 24.2 No tender should be withdrawn after the deadline for submission of tender and before expiry of the tender validity period. If a tenderer withdraws the tender during this period, it will result in forfeiture of the earnest money furnished by the tenderer in its tender.

## **E. TENDER OPENING**

### **25. Opening of Tenders**

- 25.1 The tenders will be opened at the specified date and time and at the specified place as indicated in the Schedule for submission of tenders.

In case the specified date of tender opening falls on/is subsequently declared a holiday or closed day for the purchaser, the tenders will be opened at the appointed time and place on the next working day.

- 25.2 Authorized representatives of the tenderers, who have submitted tenders on time may attend the tender opening provided they bring with them letters of authority from the corresponding tenderers.
- 25.3 Two -Bid Tender system as mentioned in para 21.5 above will be as follows. The **Techno - Commercial Tenders** are to be opened in the first instance, at the prescribed time and date as indicated in NIT. These Tenders shall be scrutinized and evaluated by the competent committee/ authority with reference to parameters prescribed in the TE document. During the Techno - Commercial Tender evaluation, the tender opening official(s) will assess the salient features of the tenders like brief description of the goods offered, delivery period, Earnest Money Deposit and any other special features of the tenders, as deemed fit by the tender opening evaluation committee. Thereafter, in the second stage, the Price Tenders of only the Techno - Commercially acceptable offers (as decided in the first stage) shall be opened for further scrutiny and evaluation on a date notified after the evaluation of the Techno – Commercial tender. The prices, special discount if any of the goods offered etc., as deemed fit by tender opening official(s) will be read out. The price bid of bidders who do not qualify based on the evaluation of technical bids shall be returned unopened.

## **F. SCRUTINY AND EVALUATION OF TENDERS**

### **26. Basic Principle**

- 26.1 Tenders will be evaluated on the basis of the terms & conditions already incorporated in the Tender document, based on which tenders have been received and the terms, conditions etc. mentioned by the tenderers in their tenders. No new condition will be brought in while scrutinizing and evaluating the tenders. For evaluating the Techno commercial bid, the purchaser may at its discretion call for demonstration/ presentation/ samples etc.

### **27. Responsiveness**

- 27.1 The Purchaser will examine the Tenders to determine whether they are complete, whether any computational errors have been made, whether required sureties have

been furnished, whether the documents have been properly signed stamped and whether the Tenders are generally in order.

- 27.2 Prior to the detailed evaluation of Price Tenders, the Purchaser will determine the substantial responsiveness of each Tender to the Tender Document. For purposes of these clauses, a substantially responsive Tender is one, which conforms to all the terms and conditions of the Tender Documents without material deviations. Deviations from, or objections or reservations to critical provisions such as those concerning Performance Security (GCC Clause 5), Warranty (GCC Clause 15), EMD (GIT Clause 19), Taxes & Duties (GCC Clause 20), Force Majeure (GCC Clause 26) and Applicable law (GCC Clause 31) will be deemed to be a material deviation. The Purchaser's determination of a Tender's responsiveness is to be based on the contents of the tender itself without recourse to extrinsic evidence.
- 27.3 If a Tender is not substantially responsive, it will be rejected by the Purchaser and cannot subsequently be made responsive by the Tenderer by correction of the nonconformity.
- 27.4 The tenders will be scrutinized to determine whether they are complete and meet the essential and important requirements, conditions etc. as prescribed in the Tender document. The tenders, which do not meet the basic requirements, are liable to be treated as non – responsive and will be summarily ignored.
- 27.5 The following are some of the important aspects, for which a tender shall be declared non – responsive and will be summarily ignored;
- (i) Tender form as per Section IX (signed and stamped) not enclosed
  - (ii) Tender is unsigned.
  - (iii) Tender validity is shorter than the required period.
  - (iv) Required EMD (Amount, validity etc.) have not been provided.
  - (v) Tenderer has quoted for goods manufactured by other manufacturer's/ Distributor's without the required Manufacturer's/ Distributor's Authorisation Form/consortium as per Section XIII.
  - (vi) Tenderer has not agreed to give the required performance security.
  - (vii) Goods offered are not meeting the tender enquiry specification and in demonstration.
  - (viii) Tenderer has not agreed to other essential condition(s) specially incorporated in the tender enquiry like terms of payment, liquidated damages clause, warranty clause, dispute resolution mechanism applicable law.
  - (ix) Poor/ unsatisfactory past performance.
  - (x) Tenderers who stand deregistered/banned/blacklisted by any Govt. Authorities.
  - (xi) Tenderer is not eligible as per GIT Clauses 5.1 & 17.1 and Section VIII
  - (xii) Submission of false information in the Tender.
  - (xiii) Erasure or over-writing in the tender is without initialled by the person(s) signing the tender as per GIT clause 21.

## **28. Minor Infirmary/Irregularity/Non-Conformity**

- 28.1 If during the preliminary examination, the purchaser finds any minor infirmity and/or irregularity and/or non-conformity in a tender, the purchaser may waive the same provided it does not constitute any material deviation and financial impact and, also, does not prejudice or affect the ranking order of the tenderers. Wherever necessary, the purchaser will convey its observation on such 'minor' issues to the tenderer by

registered/speed post/Courier etc. asking the tenderer to respond by a specified date. If the tenderer does not reply by the specified date or gives evasive reply without clarifying the point at issue in clear terms, that tender will be liable to be ignored.

## **29 Discrepancies in Prices**

- 29.1 If, in the price structure quoted by a tenderer, there is discrepancy between the unit price and the total price (which is obtained by multiplying the unit price by the quantity), the unit price shall prevail and the total price corrected accordingly, unless the purchaser feels that the tenderer has made a mistake in placing the decimal point in the unit price, in which case the total price as quoted shall prevail over the unit price and the unit price corrected accordingly.
- 29.2 If there is an error in a total price, which has been worked out through addition and/or subtraction of subtotals, the subtotals shall prevail and the total corrected; and
- 29.3 If there is a discrepancy between the amount expressed in words and figures, the amount in words shall prevail, subject to sub clause 29.1 and 29.2 above.
- 29.4 If, as per the judgement of the purchaser, there is any such arithmetical discrepancy in a tender, the same will be suitably conveyed to the tenderer by registered/speed post/Courier. If the tenderer does not agree to the observation of the purchaser, the tender is liable to be ignored.

## **30. Qualification Criteria**

- 30.1 Tenders of the tenderers, who do not meet the required Qualification Criteria prescribed in Section VIII, will be treated as non - responsive and will not be considered further.

## **31. Tender currency (Indian Rupee)**

- 31.1 The TE document permits the tenderers to quote their prices in Indian Rupees only.

## **32. Items Evaluation**

The List of Requirements contains more than one item. The responsive tenders will be evaluated and compared only on package cost as a turnkey tender. However the quotes shall be with item-wise unit cost and total cost with applicable taxes/duties for each and every equipment in the List of Requirements separately.

## **33. Comparison of Tenders**

The comparison of the responsive tenders shall be carried out on Free Delivery at consignee site basis. The price ranking will be carried out as under.

**Total price = Price with all accessories as per technical specification in the format given in Section – X (A)**

The tenderers shall also quote for CAMC price for 5 years as per Section – X (B) separately. Failing which the bid is liable to be rejected.

## **34. Additional Factors and Parameters for Evaluation and Ranking of Responsive Tenders**

- 34.1 Further to GIT Clause 34 above, the purchaser's evaluation of a tender will include and take into account the following:

In the case of goods manufactured in India or goods of foreign origin already located in India, GST & other similar applicable additional charges etc which will be contractually payable by the tenderer.

- 34.2 The purchaser's evaluation of tender will also take into account the additional factors, if any, incorporated in other Sections, in the manner and to the extent indicated therein.

**35. Tenderer's capability to perform the contract**

- 35.1 The purchaser, through the above process of tender scrutiny and tender evaluation will determine to its satisfaction whether the tenderer, whose tender has been determined as the lowest evaluated responsive tender is eligible, qualified and capable in all respects to perform the contract satisfactorily.
- 35.2 The above-mentioned determination will, inter alia, take into account the tenderer's financial, technical and production/execution capabilities for satisfying all the requirements of the purchaser as incorporated in the TE document. Such determination will be based upon scrutiny and examination of all relevant data and details submitted by the tenderer in its tender as well as such other allied information as deemed appropriate by the purchaser.

**36. Contacting the Purchaser**

- 36.1 From the time of submission of tender to the time of awarding the contract, if a tenderer needs to contact the purchaser for any reason relating to this tender enquiry and / or its tender, it should do so only in writing.
- 36.2 In case a tenderer attempts to influence the purchaser in the purchaser's decision on scrutiny, comparison & evaluation of tenders and awarding the contract, the tender of the tenderer shall be liable for rejection in addition to appropriate administrative actions being taken against that tenderer, as deemed fit by the purchaser.

**G. AWARD OF CONTRACT**

**37. Purchaser's Right to accept any tender and to reject any or all tenders**

- 37.1 The purchaser reserves the right to accept in part or in full any tender or reject any or more tender(s) without assigning any reason or to cancel the tendering process and reject all tenders at any time prior to award of contract, without incurring any liability, whatsoever to the affected tenderer or tenderers.

**38. Award Criteria**

The contract will be awarded to the lowest evaluated responsive tenderer decided by the purchaser as per clause 33 to 36 of GIT.

Only those bidders who qualify at the techno- commercial stage will be eligible for opening of price bids.

**39. Variation of Quantities at the Time of Award/ Currency of Contract**

- 39.1 At the time of awarding the contract, the purchaser reserves the right to increase or decrease the quantity of goods and services mentioned in the schedule (s) in the "List of Requirements" without any change in the unit price and other terms & conditions quoted by the tenderer.

- 39.2 If the quantity has not been increased at the time of the awarding the contract, the purchaser reserves the right to increase the quantity of goods and services mentioned in the contract without any change in the unit price and other terms & conditions mentioned in the contract, during the currency of the contract period.

#### **40. Notification of Award**

- 40.1 Before expiry of the tender validity period, the purchaser will notify the successful tenderer(s) in writing, by registered / speed post or by email that its tender for goods & services, which have been selected by the purchaser, has been accepted, also briefly indicating therein the essential details like description, specification and quantity of the goods & services and corresponding prices accepted. The successful tenderer must furnish to the purchaser the required Performance Security within Thirty days from the date of dispatch of the notification of award, failing which the EMD will be forfeited and the award will be cancelled. Relevant details about the performance security have been provided under GCC Clause 5 under Section III

#### **41. Issue of Contract**

- 41.1 Promptly after notification of award, the Purchaser will mail the Contract Form (as per Section XIV and XV) duly completed and signed, in duplicate, to the successful tenderer by registered / speed post.
- 41.2 Within twenty one days from the date of the contract, the successful tenderer shall return the original copy of the contract, duly signed and dated, to the Purchaser by registered / speed post.

#### **42. Non-receipt of Performance Security and Contract by the Purchaser**

- 42.1 Failure of the successful tenderer in providing performance security and / or returning contract copy duly signed in terms of GIT clauses 41 and 42 above shall make the tenderer liable for forfeiture of its EMD and, also, for further actions by the Purchaser against it as per the clause 24 of GCC – Termination of default.

#### **43. Return of EMD**

- 43.1 The earnest money of the successful tenderer and the unsuccessful tenderers will be returned to them without any interest, whatsoever, in terms of GIT Clause 19.4 and 19.5.

#### **44. Corrupt or Fraudulent Practices**

- 44.1 It is required by all concerned namely the Consignee/ Tenderers/ Suppliers/ Consortiumetc to observe the highest standard of ethics during the procurement and execution of such contracts. In pursuance of this policy, the Purchaser: -  
defines, for the purposes of this provision, the terms set forth below as follows:  
“corrupt practice” means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the procurement process or in contract execution; and

“fraudulent practice” means a misrepresentation of facts in order to influence a procurement process or the execution of a contract to the detriment of the Purchaser, and includes collusive practice among Tenderers (prior to or after Tender submission)

designed to establish Tender prices at artificial non-competitive levels and to deprive the Purchaser of the benefits of free and open competition;

will reject a proposal for award if it determines that the Tenderer recommended for award has engaged in corrupt or fraudulent practices in competing for the contract in question;

will declare a firm ineligible, either indefinitely or for a stated period of time, to be awarded a contract by the purchaser if it at any time determines that the firm has engaged in corrupt or fraudulent practices in competing for, or in executing the contract.

## **SECTION - III**

### **GENERAL CONDITIONS OF CONTRACT (GCC)**

#### **1. Application**

- 1.1 The General Conditions of Contract incorporated in this section shall be applicable for this purchase to the extent the same are not superseded by the Special Conditions of Contract prescribed under Section IV, List of requirements under Section V and Technical Specification under Section VI of this document.

#### **2. Use of contract documents and information**

- 2.1 The supplier shall not, without the purchaser's prior written consent, disclose the contract or any provision thereof including any specification, drawing, sample or any information furnished by or on behalf of the purchaser in connection therewith, to any person other than the person(s) employed by the supplier in the performance of the contract emanating from this TE document. Further, any such disclosure to any such employed person shall be made in confidence and only so far as necessary for the purposes of such performance for this contract.
- 2.2 Further, the supplier shall not, without the purchaser's prior written consent, make use of any document or information mentioned in GCC sub-clause 2.1 above except for the sole purpose of performing this contract.
- 2.3 Except the contract issued to the supplier, each and every other document mentioned in GCC sub-clause 2.1 above shall remain the property of the purchaser and, if advised by the purchaser, all copies of all such documents shall be returned to the purchaser on completion of the supplier's performance and obligations under this contract.

#### **3. Patent Rights**

- 3.1 The supplier shall, at all times, indemnify and keep indemnified the purchaser, free of cost, against all claims which may arise in respect of goods & services to be provided by the supplier under the contract for infringement of any intellectual property rights or any other right protected by patent, registration of designs or trademarks. In the event of any such claim in respect of alleged breach of patent, registered designs, trade marks etc. being made against the purchaser, the purchaser shall notify the supplier of the same and the supplier shall, at his own expenses take care of the same for settlement without any liability to the purchaser.

#### **4. Country of Origin**

- 4.1 All goods and services to be supplied and provided for the contract shall have the origin in India or in the countries with which the Government of India has trade relations.
- 4.2 The word "origin" incorporated in this clause means the place from where the goods are, manufactured, or from where the services are arranged.  
The country of origin may be specified in the Price Schedule.

## **5. Performance Security**

- 5.1 Within thirty (30) days from date of the issue of notification of award by the Purchaser, the supplier, shall furnish Performance Security to the Purchaser for an amount equal to five percent (5%) of the total value of the contract, valid up to 60 days after the date of completion of 5 years warranty period / all contractual obligations by the supplier, including the warranty obligations, initially valid for a total period of minimum 62 months from the date of Notification of Award.
- 5.2 The Performance security shall be denominated in Indian Rupees.
- a) It shall be in any one of the forms namely Account Payee Demand Draft drawn from any Nationalised bank in India or Bank Guarantee issued by a Nationalised bank in India, in the prescribed form as provided in section XII of this document in favour of the Purchaser. The validity of Bank Guarantee will be for a period up to sixty (60) days beyond respective Warranty Period.
- 5.3 In the event of any failure /default of the supplier with or without any quantifiable loss to the Purchaser the amount of the performance security is liable to be forfeited. The Purchaser may do the needful to cover any failure/default of the supplier with or without any quantifiable loss to the Purchaser.
- 5.4 In the event of any amendment issued to the contract, the supplier shall, within twenty-one (21) days of issue of the amendment, furnish the corresponding amendment to the Performance Security (as necessary), rendering the same valid in all respects in terms of the contract, as amended.
- 5.5 The supplier shall enter into CAMC as per the ‘Contract Form – B’ in Section XV with Purchaser/Purchaser’s Client, 3 (three) months prior to the completion of Warranty Period. The CAMC will commence from the date of expiry of the Warranty Period.
- 5.6 Subject to GCC sub – clause 5.3 above, the Purchaser will release the Performance Security without any interest to the supplier on completion of the supplier’s warranty and contractual obligations including submission of satisfactory performance certificates received from Hospital authorities towards quarterly preventive maintenance and breakdown maintenance services rendered by the contractor during warranty period.

## **6. Technical Specifications and Standards**

- 6.1 The Goods & Services to be provided by the supplier under this contract shall conform to the technical specifications and quality control parameters mentioned in ‘Technical Specification’ and ‘Quality Control Requirements’ under Sections VI and VII of this document.

## **7. Packing and Marking**

- 7.1 The packing for the goods to be provided by the supplier should be strong and durable enough to withstand, without limitation, the entire journey during transit including transshipment (if any), rough handling, open storage etc. without any damage, deterioration etc. As and if necessary, the size, weights and volumes of the

packing cases shall also take into consideration, the remoteness of the final destination of the goods and availability or otherwise of transport and handling facilities at all points during transit up to final destination as per the contract.

- 7.2 The quality of packing, the manner of marking within & outside the packages and provision of accompanying documentation shall strictly comply with the requirements as provided in Technical Specifications and Quality Control Requirements under Sections VI and VII and in SCC under Section IV. In case the packing requirements are amended due to issue of any amendment to the contract, the same shall also be taken care of by the supplier accordingly.

- 7.3 Packing instructions:

Unless otherwise mentioned in the Technical Specification and Quality Control Requirements under Sections VI and VII and in SCC under Section IV, the supplier shall make separate packages for each consignee (in case there is more than one consignee mentioned in the contract) and mark each package on three sides with the following with indelible paint of proper quality:

- a. contract number and date
- b. brief description of goods including quantity
- c. packing list reference number
- d. country of origin of goods
- e. consignee's name and full address and
- f. supplier's name and address

## **8. Inspection, Testing and Quality Control**

- 8.1 The purchaser and/or its nominated representative(s) will inspect and/or test the ordered goods and the related services to confirm their conformity to the contract specifications and other quality control details incorporated in the contract. The purchaser shall inform the supplier in advance, in writing, the purchaser's programme for such inspection and, also the identity of the officials to be deputed for this purpose. The cost towards the transportation, boarding & lodging will be borne by the purchaser and/or its nominated representative(s).
- 8.2 The Technical Specification and Quality Control Requirements incorporated in the contract shall specify what inspections and tests are to be carried out and, also, where and how they are to be conducted. If such inspections and tests are conducted in the premises of the supplier all reasonable facilities and assistance, including access to relevant drawings, design details and production data, shall be furnished by the supplier to the purchaser's inspector at no charge to the purchaser.
- 8.3 If during such inspections and tests the contracted goods fail to conform to the required specifications and standards, the purchaser's inspector may reject them and the supplier shall either replace the rejected goods or make all alterations necessary to meet the specifications and standards, as required, free of cost to the purchaser and resubmit the same to the purchaser's inspector for conducting the inspections and tests again.
- 8.4 In case the contract stipulates pre-despatch inspection of the ordered goods at supplier's premises, the supplier shall put up the goods for such inspection to the purchaser's inspector well ahead of the contractual delivery period, so that the

purchaser's inspector is able to complete the inspection within the contractual delivery period.

- 8.5 If the supplier tenders the goods to the purchaser's inspector for inspection at the last moment without providing reasonable time to the inspector for completing the inspection within the contractual delivery period, the inspector may carry out the inspection and complete the formality beyond the contractual delivery period at the risk and expense of the supplier.
- 8.6 The purchaser's/consignee's contractual right to inspect, test and, if necessary, reject the goods after the goods' arrival at the final destination shall have no bearing of the fact that the goods have previously been inspected and cleared by purchaser's inspector during pre-despatch inspection mentioned above.
- 8.7 Goods accepted by the Purchaser and/or its inspector at initial inspection and in final inspection in terms of the contract shall in no way dilute purchaser's/consignee's right to reject the same later, if found deficient in terms of the warranty clause of the contract, as incorporated under GCC Clause 15.  
If required by the purchaser, Foreign supplier shall also have the equipment inspected by recognised/ reputed agency like SGS, Lloyd or equivalent (acceptable to the purchaser) prior to despatch at the supplier's cost and furnish necessary certificate from the said agency in support of their claim.  
For details of final inspection please refer section IV, special conditions of Contract.

## **9.0 Terms of Delivery**

Goods shall be delivered by the supplier in accordance with the terms of delivery as follows:

- a) The goods shall be supplied, unpacked, installed and commissioned at the designated location as per the SECTION V. The project has to be completed within 60 days from date of order. All costs including insurance, loading, unloading etc., shall be borne by the supplier.

## **10. Transportation of Goods**

The supplier shall at their own experience, arrange transport (including air/sea/land), loading & unloading of goods upto the consignee address.

## **11. Insurance:**

- 11.1 Unless otherwise instructed in the SCC, the supplier shall make arrangements for insuring the goods against loss or damage incidental to manufacture or acquisition, transportation, storage and delivery in the following manner:

In case of supply of domestic goods on Consignee site basis, the supplier shall be responsible till the entire goods contracted for arrival in good condition at destination. The transit risk in this respect shall be covered by the Supplier by getting the goods duly insured. The insurance cover shall be obtained by the Supplier and should be valid till installation, testing and commissioning of the equipments.

If the equipments are not commissioned and handed over to the consignee within stipulated period, the insurance will be extended by the supplier at their cost till the successful installation, testing, commissioning and handing over of the goods to the

consignee. In case the delay in the installation and commissioning is due to handing over of the site to the supplier by the consignee, such extensions of the insurance will still be done by the supplier, but the insurance extension charges at actuals will be reimbursed.

## **12. Spare parts**

- 12.1 If specified in the List of Requirements and in the resultant contract, the supplier shall supply/provide any or all of the following materials, information etc. pertaining to spare parts manufactured and/or supplied by the supplier:
- a) The spare parts as selected by the Purchaser to be purchased from the supplier, subject to the condition that such purchase of the spare parts shall not relieve the supplier of any contractual obligation including warranty obligations; and
  - b) In case the production of the spare parts is discontinued:
    - i) Sufficient advance notice to the Purchaser before such discontinuation to provide adequate time to the purchaser to purchase the required spare parts, etc. at the supplier's risk and cost ., and
    - ii) Immediately following such discontinuation, providing the Purchaser, free of cost, the designs, drawings, layouts and specifications of the spare parts, as and if requested by the Purchaser.
- 12.2 Supplier shall carry sufficient inventories to assure ex-stock supply of consumable spares for the goods so that the same are supplied to the Purchaser promptly on receipt of order from the Purchaser.

## **13. Incidental services**

- 13.1 Subject to the stipulation, if any, in the SCC (Section – IV), List of equipments (Section – V) and the Technical Specification (Section – VI), the supplier shall be required to perform the following services.
- i) Installation & Commissioning, Supervision and Demonstration of the goods and rectification of accidental damages occurred before handing over the system/site to Hospital authorities.
  - ii) Providing required jigs and tools for assembly, minor civil works required for the completion of the installation.
  - iii) Training to Doctors/Technicians on equipments in clinical aspects for operating and maintaining the equipments.
  - iv) Supplying required number of operation & maintenance manual for the goods.
  - v) Providing all the necessary as built drawings after the installation and commissioning.
  - ix) Provide all software updates during warranty period without any additional cost.

## **14. Distribution of Dispatch Documents for Clearance/Receipt of Goods**

The supplier shall send all the relevant despatch documents well in time to the Purchaser to enable the Purchaser clear or receive (as the case may be) the goods in terms of the contract. Unless otherwise specified in the SCC, the usual documents involved and the drill to be followed in general for this purpose are as follows.

- A) For Domestic Goods, including goods already imported by the supplier under its own arrangement.

Within 24 hours of despatch, the supplier shall notify the purchaser, consignee, and others concerned if mentioned in the contract, the complete details of despatch and also supply the following documents to them by registered post / speed post (or as instructed in the contract):

Four copies of supplier's invoice showing contract number, goods description, quantity, unit price and total amount;

Consignee Receipt Certificate as per Section XVI in original issued by the authorized representative of the consignee;

Two copies of packing list identifying contents of each package;

Inspection certificate issued by the nominated Inspection agency, if any.

Certificate of origin;

Insurance Certificate as per GCC Clause 11

Manufacturers/Supplier's warranty certificate & In-house inspection certificate.

## **15. Warranty**

- 15.1 The supplier warrants comprehensively that the goods supplied under the contract is new, unused and incorporate all recent improvements in design and materials unless prescribed otherwise by the purchaser in the contract. The supplier further warrants that the goods supplied under the contract shall have no defect arising from design, materials (except when the design adopted and / or the material used are as per the Purchaser's/Consignee's specifications) or workmanship or from any act or omission of the supplier, that may develop under normal use of the supplied goods under the conditions prevailing in India.
- 15.2 This warranty shall remain valid for 5 years/ 1 year as per SECTION V (LIST OF REQUIREMENTS) from the date of handing over entire equipment and acceptance by the Purchaser/Hospital in terms of the contract after installation and commissioning, unless specified otherwise in the SCC.
- 15.3 In case of any claim arising out of this warranty, the Purchaser shall promptly notify the same in writing to the supplier. The period of the warranty will be as per GCC clause number 15.2 above irrespective of any other period mentioned elsewhere in the bidding documents.
- 15.4 Upon receipt of such notice, the supplier shall, within 8 hours on a 24 (hrs) X 7 (days) X 365 (days) basis respond to take action to repair or replace the defective goods or parts thereof, free of cost, at the ultimate destination. The supplier shall take over the replaced parts/goods after providing their replacements and no claim, whatsoever shall lie on the purchaser for such replaced parts/goods thereafter. The penalty clause form on rectification will be applicable as per tender conditions.
- 15.5 In the event of any rectification of a defect or replacement of any defective goods during the warranty period, the warranty for the rectified/replaced goods shall be extended to a further period from the date such rectified / replaced goods starts functioning to the satisfaction of the purchaser.
- 15.6 If the supplier, having been notified, fails to respond to take action to repair or replace the defect(s) within 8 hours on a 24(hrs) X 7 (days) X 365 (days) basis, the purchaser

may proceed to take such remedial action(s) as deemed fit by the purchaser, at the risk and expense of the supplier and without prejudice to other contractual rights and remedies, which the purchaser may have against the supplier.

- 15.7 During Warranty period, the supplier is required to visit consignee's site at least once in 4 months commencing from the date of the installation for preventive maintenance of the goods.
- 15.8 The Purchaser reserve the rights to enter into CAMC between Purchaser/Purchaser's Client and the Supplier for the period of 5 years as mentioned in this tender, after the completion of 5 year warranty.
- 15.9 The supplier along with its Indian Agent and the CAMC provider shall ensure continued supply of the spare parts for the constant performance of the machines and equipments supplied by them to the purchaser for 10 years from the date of installation and handing over.
- 15.10 The Supplier along with its Indian Agent and the CAMC Provider shall always accord most favoured client status to the Purchaser vis-à-vis its other Clients/Purchasers of its equipment/machines/goods etc. and shall always give the most competitive price for its machines/equipment supplied to the Purchaser.

## **16. Assignment**

- 16.1 The Supplier shall not assign, either in whole or in part, its contractual duties, responsibilities and obligations to perform the contract, except with the Purchaser's prior written permission.

## **17. Sub Contracts**

- 17.1 The Supplier shall notify the Purchaser in writing of all sub contracts awarded under the contract if not already specified in its tender. Such notification, in its original tender or later, shall not relieve the Supplier from any of its liability or obligation under the terms and conditions of the contract.
- 17.2 Sub contract shall be only for bought out items and sub-assemblies.
- 17.3 Sub contracts shall also comply with the provisions of GCC Clause 4 ("Country of Origin").

## **18. Modification of contract**

- 18.1 If necessary, the purchaser may, by a written order given to the supplier at any time during the currency of the contract, amend the contract by making alterations and modifications within the general scope of contract in any one or more of the following:
  - a) Specifications, drawings, designs etc. where goods to be supplied under the contract are to be specially manufactured for the purchaser,
  - b) Mode of packing,
  - c) Incidental services to be provided by the supplier
  - d) Mode of despatch,
  - e) Place of delivery, and
  - f) Any other area(s) of the contract, as felt necessary by the purchaser depending on the merits of the case.

- 18.2 In the event of any such modification/alteration causing increase or decrease in the cost of goods and services to be supplied and provided, or in the time required by the supplier to perform any obligation under the contract, an equitable adjustment shall be made in the contract price and/or contract delivery schedule, as the case may be, and the contract shall be amended accordingly.

## **19. Prices**

- 19.1 Prices to be charged by the supplier for supply of goods and provision of services in terms of the contract shall not vary from the corresponding prices quoted by the supplier in its tender and incorporated in the contract, except for any price adjustment authorised in the SCC.

## **20. Taxes and Duties**

- 20.1 Supplier shall be entirely responsible for all taxes, duties, fees, levies etc. incurred until delivery of the contracted goods to the purchaser.
- 20.2 Further instruction, if any, shall be as provided in the SCC.

## **21. Terms and Mode of Payment**

### **A) Payment Terms - Equipment Supply**

- a) 50% of supply value shall be released against supply and certificate for receipt of the item in good condition from the Hospital/purchaser.
- b) 45% payment shall be released against certificate of installation and commissioning certified by the Hospital Authorities/purchaser.
- c) Final 5% shall be released against submission of certificate issued by Hospital/purchaser certifying that the facility has been installed, commissioned and handed over and submission on Performance Security and other documents stated in this tender.
- d) Payment shall be made subject to recoveries, if any, by way of liquidated damages or any other charges as per terms & conditions of contract and upon the submission of the following documents:
  - i. Four copies of supplier's invoice showing contract number, goods description, quantity, unit price and total amount;
  - ii. Consignee Receipt Certificate as per Section XVII in original issued by the authorized representative of the consignee;
  - iii. Two copies of packing list identifying contents of each package;
  - iv. Inspection certificate issued by the nominated Inspection agency, if any.
  - v. Insurance Certificate as per GCC Clause 11 and documents also to be submitted for payment of LC confirming that dispatch documents has already been sent to all concerned as per the contract within 24 hours;
  - vi. Certificate of origin.

### **B) Payment Terms - Turnkey part (Civil & Electrical works)**

- a) 50% of the total value of work may be released upon the completion of 60 % of the work recommended by State In charge (P&S, HLL) and approved by Project Engineer (P&S, HLL)/ Manager (P&S, HLL).

- b) Balance 50% will be paid along with the final bill only after submission of Work Completion certificate issued by the concerned hospital and approved by Project Engineer (P&S, HLL)/ Manager (P&S, HLL).
- c) 5% amount of the Bill will be retained as retention money and will be released only after the Defect liability period of 12 months.
- d) Final Bill to be submitted detailing the work description, quantity and rate as per the Work Order. Payment will be made against actual measurements recorded and certified jointly by State In Charge (P&S, HLL) and the Contractor 's representative, counter signed by Project Engineer (P&S, HLL)/ Manager (P&S, HLL). The work completion certificate will be issued by the concerned centres/hospitals and it is the responsibility of the contractor to collect the completion certificate certified by the concerned hospital authority & HLL authorities and submit to HLL for balance 50% payment
- e) The running account bills are to be submitted detailing the work description, quantity and rate as per the Work Order. Payment will be made against actual measurements recorded and certified jointly by State in charge (P&S, HLL) and the Contractor's representative. For supply of capital items, duly certified delivery challan/supporting documents such as Warranty Certificates etc. shall be enclosed along with bill.
- f) Tax Deduction: All statutory deductions like GST, Income Tax, Works Contract Tax, E.S.I., P.F. or any other government-imposed liabilities shall be borne by the Contractor (as applicable at the time of execution of job) and shall be deducted from each bill submitted by the Contractor.

#### 21.1 CAMC Payment :

The payment of CAMC will be made on half yearly basis, after satisfactory completion of said period on submission of bills with supporting documents, certified by the Hospital authorities, in proof of preventive and breakdown maintenance having rendered in the 4 months. In case the supplier fails carry out the preventive maintenance, in the stipulated period, the purchaser may extend the period of contract to the period of non services or impose the penalty on the supplier at the discretion of the Purchaser. However such non service(s) is/ are by a reason of Hospital, the penalty / extension mentioned above will not be applicable.

- 21.2 The supplier shall not claim any interest on payments under the contract.
- 21.3 Where there is a statutory requirement for tax deduction at source, such deduction towards income tax and other tax as applicable will be made from the bills payable to the Supplier at rates as notified from time to time.
- 21.4 The payment shall be made in Indian Rupees.
- 21.5 The supplier shall send its claim for payment in writing, when contractually due, along with relevant documents etc., duly signed with date.
- 21.6 While claiming payment, the supplier is also to certify in the bill that the payment being claimed is strictly in terms of the contract and all the obligations on the part of the supplier for claiming that payment has been fulfilled as required under the contract.
- 21.7 The payment for the preventive maintenance will be released only on the submission of performance security of 5% for the particular year.

## **22. Delay in the supplier's performance**

- 22.1 The supplier shall deliver of the goods and perform the services under the contract within the time schedule specified by the Purchaser in the List of Requirements and as incorporated in the contract.
- 22.2 Subject to the provision under GCC clause 26, any unexcused delay by the supplier in maintaining its contractual obligations towards delivery of goods and performance of services shall render the supplier liable to any or all of the following sanctions:
- (i) Imposition of liquidated damages
  - or
  - (ii) Forfeiture of its performance security and
  - (iii) Termination of the contract for default.
- 22.3 If at any time during the currency of the contract, the supplier encounters conditions hindering timely delivery of the goods and performance of services, the supplier shall promptly inform the Purchaser in writing about the same and its likely duration and make a request to the Purchaser for extension of the delivery schedule accordingly. On receiving the supplier's communication, the Purchaser shall examine the situation as soon as possible and, at its discretion, may agree to extend the delivery schedule, with or without liquidated damages for completion of supplier's contractual obligations by issuing an amendment to the contract.
- 22.4 When the period of delivery is extended due to unexcused delay by the supplier, the amendment letter extending the delivery period shall, interalia contain the following conditions:
- (a) The Purchaser shall recover from the supplier, under the provisions of the clause 23 of the General Conditions of Contract, liquidated damages on the goods and services, which the Supplier has failed to deliver within the delivery period stipulated in the contract.
  - (b) That no increase in price on account of any ground, whatsoever, including any stipulation in the contract for increase in price on any other ground and, also including statutory increase in or fresh imposition of applicable taxes or on account of any other tax or duty which may be levied in respect of the goods and services specified in the contract, which takes place after the date of delivery stipulated in the contract shall be admissible on such of the said goods and services as are delivered and performed after the date of the delivery stipulated in the contract.
  - (c) But nevertheless, the Purchaser shall be entitled to the benefit of any decrease in price on account of reduction in or remission of applicable taxes or any other duty or tax or levy or on account of any other grounds, which takes place after the expiry of the date of delivery stipulated in the contract.
- 22.5 The supplier shall not dispatch the goods after expiry of the delivery period. The supplier is required to apply to the Purchaser for extension of delivery period and obtain the same before despatch. In case the supplier dispatches the goods without obtaining an extension, it would be doing so at its own risk and no claim for payment for such supply and / or any other expense related to such supply shall lie against the purchaser.

## **23. Liquidated damages**

- 23.1 Subject to GCC clause 26, if the supplier fails to deliver any or all of the goods or fails to perform the services within the time frame(s) incorporated in the contract, the Purchaser shall, without prejudice to other rights and remedies available to the Purchaser under the contract, deduct from the contract price, as liquidated damages, a sum equivalent to 0.5% per week of delay or part thereof on delayed supply of goods and/or services until actual delivery or performance subject to a maximum of 10% of the contract price or actual liability of the purchaser due to delayed supply of goods and/or services/ or total performance of the contractor, whichever is higher. Once the maximum is reached Purchaser may consider termination of the contract as per GCC 24.

During the above-mentioned delayed period of supply and / or performance, the conditions incorporated under GCC sub-clause 22.4 above shall also apply.

## **24. Termination for default**

- 24.1 The Purchaser, without prejudice to any other contractual rights and remedies available to it (the Purchaser), may, by written notice of default sent to the supplier, terminate the contract in whole or in part, if the supplier fails to deliver any or all of the goods or fails to perform any other contractual obligation(s) within the time period specified in the contract, or within any extension thereof granted by the purchaser pursuant to GCC sub-clauses 22.3 and 22.4.
- 24.2 In the event of the Purchaser terminates the contract in whole or in part, pursuant to GCC sub-clause 24.1 above, the Purchaser may procure goods and/or services similar to those cancelled, with such terms and conditions and in such manner as it deems fit and the supplier shall be liable to the Purchaser for the extra expenditure, if any, incurred by the Purchaser for arranging such procurement.
- 24.3 Unless otherwise instructed by the Purchaser, the supplier shall continue to perform the contract to the extent not terminated.

## **25. Termination for insolvency**

- 25.1 If the supplier becomes bankrupt or otherwise insolvent, the purchaser reserves the right to terminate the contract at any time, by serving written notice to the supplier without any compensation, whatsoever, to the supplier, subject to further condition that such termination will not prejudice or affect the rights and remedies which have accrued and / or will accrue thereafter to the Purchaser.

## **26. Force Majeure**

- 26.1 Notwithstanding the provisions contained in GCC clauses 22, 23 and 24, the supplier shall not be liable for imposition of any such sanction so long the delay and/or failure of the supplier in fulfilling its obligations under the contract is the result of an event of Force Majeure.
- 26.2 For purposes of this clause, Force Majeure means an event beyond the control of the supplier and not involving the supplier's fault or negligence and which is not foreseeable and not brought about at the instance of, the party claiming to be affected by such event and which has caused the non-performance or delay in performance. Such events may include, but are not restricted to, acts of the Purchaser either in its sovereign or contractual capacity, wars or revolutions, hostility, acts of public enemy,

civil commotion, sabotage, fires, floods, explosions, epidemics, quarantine restrictions, strikes excluding by its employees , lockouts excluding by its management, and freight embargoes.

- 26.3 If a Force Majeure situation arises, the supplier shall promptly notify the Purchaser in writing of such conditions and the cause thereof within seven days of occurrence of such event. Unless otherwise directed by the Purchaser in writing, the supplier shall continue to perform its obligations under the contract as far as reasonably practical, and shall seek all reasonable alternative means for performance not prevented by the Force Majeure event.
- 26.4 If the performance in whole or in part or any obligation under this contract is prevented or delayed by any reason of Force Majeure for a period exceeding sixty days, either party may at its option terminate the contract. Termination of this agreement for whatever reason shall not affect the obligation/ liabilities of both the parties accrued hereunder in respect of matters at the time of the agreement.
- 26.5 In case due to a Force Majeure event the Purchaser is unable to fulfil its contractual commitment and responsibility, the Purchaser will notify the supplier accordingly and subsequent actions shall be taken on similar lines described in above sub-paragraphs.

## **27. Termination for convenience**

- 27.1 The Purchaser reserves the right to terminate the contract, in whole or in part for its (Purchaser's) convenience, by serving 7days written notice on the supplier at any time during the currency of the contract. The notice shall specify that the termination is for the convenience of the Purchaser. The notice shall also indicate inter alia, the extent to which the supplier's performance under the contract is terminated, and the date with effect from which such termination will become effective.
- 27.2 The goods and services which are complete and ready in terms of the contract for delivery and performance within thirty days after the supplier's receipt of the notice of termination shall be accepted by the Purchaser following the contract terms, conditions and prices. For the remaining goods and services, the Purchaser may decide:
- a) To get any portion of the balance completed and delivered at the contract terms, conditions and prices; and / or
  - b) To cancel the remaining portion of the goods and services and compensate the supplier by paying an agreed amount for the cost incurred by the supplier towards the remaining portion of the goods and services.

## **28. Governing language**

- 28.1 The contract shall be written in English language following the provision as contained in GIT clause 4. All correspondence and other documents pertaining to the contract, which the parties exchange, shall also be written accordingly in that language.

## **29. Notices**

- 29.1 Notice, if any, relating to the contract given by one party to the other, shall be sent in writing or by cable and confirmed in writing. The procedure will also provide the sender of the notice, the proof of receipt of the notice by the receiver. The addresses of the parties for exchanging such notices will be the addresses as incorporated in the contract.
- 29.2 The effective date of a notice shall be either the date when delivered to the recipient or the effective date specifically mentioned in the notice, whichever is later.

### **30. Resolution of disputes**

- 30.1 If dispute or difference of any kind shall arise between the Purchaser and the supplier in connection with or relating to the contract, the parties shall make every effort to resolve the same amicably by mutual consultations.

If the parties fail to resolve their dispute or difference by such mutual consultations within twenty one days of its occurrence the same shall be referred for arbitration to a Sole arbitrator to be appointed by the C&MD, of the Purchaser Arbitration shall be conducted as per the provisions of the Arbitration and Conciliation Act 1996 or any statutory modification or re-enactment thereof for the time be in force. The arbitrator shall give a reasoned award. The award of the arbitrator shall be final and binding on the parties to this contract. The venue of arbitration shall be Thiruvananthapuram, Kerala, India and the language of the proceedings shall be English  
The arbitrator shall be requested to give reasoned award.

### **31. Applicable Law**

The contract shall be governed by and interpreted in accordance with the laws of India for the time being in force.

### **32. General/ Miscellaneous Clauses**

- a. Nothing contained in this Contract shall be constructed as establishing or creating between the parties, i.e. the Supplier/its Indian Agent/CAMC Provider on the one side and the Purchaser on the other side, a relationship of master and servant or principal and agent.
- b. Any failure on the part of any Party to exercise right or power under this Contract shall not operate as waiver thereof.
- c. The Supplier shall notify the Purchaser of any material change would impact on performance of its obligations under this Contract.
- d. Each member/constituent of the Supplier/its Indian Agent/CAMC Provider, in case of consortium shall be jointly and severally liable to and responsible for all obligations towards the Purchaser for performance of contract/services including that of its Associates/Sub Contractors under the Contract.
- e. The Supplier/its Indian Agent/CAMC Provider shall at all times, indemnify and keep indemnified the Purchaser against all claims/damages etc. for any infringement of any Intellectual Property Rights (IPR) while providing its services under CAMC or the Contract.
- f. The Supplier/its Agent/CAMC Provider shall, at all times, indemnify and keep indemnified the Purchaser against any claims in respect of any damages or compensation payable in consequences of any accident or injury sustained or suffered by its employees or agents or by any other third party resulting from or by any action, omission or operation conducted by or on behalf of the supplier/its associate/affiliate etc.
- g. All claims regarding indemnity shall survive the termination or expiry of the contract

## SECTION –IV

### SPECIAL CONDITIONS OF CONTRACT (SCC)

#### 1. General requirement for eligibility

- a) In order to decide the responsiveness of tender, the Purchaser may ask to the tenderer for Demonstration of equipment/system, presentations and sample and the tenderer shall arrange Purchaser's requirement as and when so asked, failing which the tender shall be deemed as non-responsive.
- b) The Licences, Certifications, if any, required from the regulatory authorities in India with respect to this tender shall be produced along with the tender.
- c) All technical details, catalogue, application details, shall be provided along with the tender.
- d) Signed copy of Tender Document (all pages of Bid documents to be signed & stamped) by the Bidder as token of acceptance of the Terms & Conditions.
- e) Duly filled, signed and sealed forms as per the Annexures of the tender document.
- f) Power of attorney in Rs 300/- in non-judicial stamp paper duly notarized by the authorized signatory to sign and submit the bid documents
- g) Sales Tax Clearance certificate(self attested copy)
- h) Copy of PAN Card.(self attested Copy)
- i) GST Registration Certificate
- j) Certificate of incorporation / Memorandum of Article (self attested copy)
- k) Last 3 financial years audited Profit & Loss, Balance Sheet duly certified by Chartered Accountant.
- l) EMD as per tender document.
- m) Tender Fee as per tender document. Undertaking for replacement of complaint / defective items as Annexure ...
- n) One to one compliance statement to technical specification requirements against each item shall be provided along with the tender, with pamphlets/Catalogs.
- o) Acceptance test should be done at designated hospitals, prior to handing over of equipment.
- p) All details of pre installation and installation works along with schedules & drawings should be supplied within a week of award of order.

#### 2. Final Inspection

The final inspection of the Goods will be done by the Technical Committee of the Purchaser and Hospital Authorities after installation and commissioning of the goods.

### **3. Warranty:**

- a) 5 years/1 year as per SECTION V (LIST OF REQUIREMENTS) for comprehensive warranty as per Conditions of Contract of the TE document for complete equipment from the date of satisfactory installation, commissioning, trial run & handing over of equipment to Hospital/Institution.
- b) 95% uptime Warranty of complete equipment with extension of Warranty period by double the downtime period on 24 (hrs) X 7 (days) X 365 (days) basis.
- c) All software updates should be provided by the supplier free of cost during Warranty period.

### **4. After Sales Service:**

After sales service centre should be available at on 24 (hrs) X 7 (days) X 365 (days) basis. Breakdowns/Complaints should be attended within 8 hrs. An undertaking by the Manufacturer shall accompany the tender that the spares for the equipment shall be available for at least 10 years from the date of supply.

### **5. CAMC :**

- a) Tenderer shall offer price for

CAMC rates separately in SECTION – X, PRICE SCHEDULE (B)

CAMC shall be awarded at the discretion of Purchaser/Hospital at the end of the warranty period.

- b) The CAMC shall be for 5 years after completion of prescribed warranty period.
- c) Preventive Maintenance services during CAMC shall be rendered on quarterly basis with minimum gap between two services shall be not less than 90 days and not more than 115 days. In addition, all breakdown calls shall be attended to immediately and all major repairs shall be rectified within 7 calendar days from the date of intimation, as per tender, failing which, a penalty of Rs.50,000/- per day thereof is leviable until the equipment is repaired and commissioned to the satisfaction of the end user, For this purpose supplier shall carry sufficient inventories to assure prompt replacement of defective parts as per tender
- d) Breakdown calls shall be attended immediately and major complaints shall be rectified within 7 calendar days from the date of intimation. The breakdown calls shall not be combined with preventive maintenance calls.
- e) In case the performance of CAMC services is not satisfactory and found below the 95% uptime level, the Purchaser / Hospital has the right to source the maintenance services from other means/agency at the risk and cost of supplier including termination of contract and legal/penal actions.
- f) On receipt of CAMC order, the supplier shall furnish performance security for an amount equal to 5% of the CAMC value per annum in the form of Demand Draft or Performance Bank Guarantee, which will be renewed in term with value of every year till completion of CAMC period.

- g) The cost of CAMC includes preventive maintenance with required testing, calibration as per technical/service/operational manual, labour and spares. The supplier shall undertake preventive maintenance as recommended in the manufacturer's technical/service /operational manual, but minimum once in three months during the 5 years CAMC period for preventive maintenance.
- h) The cost of CAMC may be quoted along with taxes and duties applicable on the date of Tender Opening. The taxes to be paid extra, to be specifically stated. In the absence of any such stipulation, the price will be taken inclusive of such taxes and no claim for the same will be entertained later.
- i) The payment of CAMC will be made once in every four months after satisfactory completion of said period, duly certified by Hospital authorities, but subject to valid Performance Security.
- j) There will be 95% uptime warranty during CAMC period on 24 (hrs) X 7 (days) X 365 (days) basis, with penalty, to extend CAMC period by double the downtime period.
- k) During the CAMC period, all software updates should be provided free of cost.

**SECTION V****LIST OF REQUIREMENTS**

<b>Sl. No</b>	<b>List of Essential Equipments for PICU 22 Bedded</b>	<b>Warranty</b>	<b>Supply Qty</b>
1	Fully automatic ICU cots with Mattress	5 Years	20 Nos.
2	Over bed table	5 Years	20 Nos.
3	Pediatric Ventilator	5 Years	2 Nos.
4	Multiparamonitor – Modular (Type – I)	5 Years	1 No.
5	Multiparamonitor – Modular (Type- II)	5 Years	4 Nos.
6	ECG Machine 12 Channel	5 Years	1 No.
7	Stretcher	5 Years	1 No.
8	Bi-PAP	5 Years	2 Nos.
9	Syringe pump, 10,20,50 ml	5 Years	20 Nos.
10	Infusion Pump	5 Years	2 Nos.
11	Pump, suction, portable, 220V	5 Years	3 Nos.
12	Spot Lamp (Emergency Lamp)	5 Years	1 No.
13	Glucometer with dextrostix with 100 strips	1 Year	1 No.
14	Pediatric weighing scale with Stadiometer	1 Year	1 No.
15	Nappy Weighing scale	1 Year	1 No.
16	Stethoscope, binaural, Pediatric	1 Year	6 Nos.
17	Sphygmomanometer, Pediatric (Air type, HEINE type)	1 Year	5 Nos.
18	Laryngoscope set - All blades	N/A	11 Nos.
19	Resuscitator, hand-operated, Pediatric, 250ml	N/A	6 Nos.
20	Resuscitator, hand-operated, Pediatric, 500ml	N/A	6 Nos.
21	Resuscitator, hand-operated, Pediatric, 1000ml	N/A	6 Nos.
22	Hub cutter, syringe	N/A	3 Nos.
23	Crash Cart – Modular	N/A	11 Nos.
24	USG cum Echo Machine for pediatric	5 Years	1 No.

<b>Sl. No</b>	<b>List of Essential Equipments for PICU 22 Bedded</b>	<b>Warranty</b>	<b>Supply Qty</b>
25	Pediatric Video Bronchoscope	1 Year	1 No.
26	Instrument Trolley – Modular	N/A	3 Nos.
27	Wall Clock with Second hand	N/A	7 Nos.
28	Double door Refrigerator 250Ltrs with stand and stabilizer	1 Year	1 No.
29	Air Conditioning with (AHU) with HEPA filter with positive air pressure and one room with negative pressure with minimum 20 air changes per hour with class 10000 standards	5 Years	(1 Job)
30	Online UPS for all the PICU beds with 30min backup	5 Years	(1 Job)
31	Fully SS tables for ABG/ECG etc.,	N/A	2 Nos.
32	Dress Hangers	N/A	3 Nos.
33	HHHNFC (Heated Humidifier)	1 Year	1 No.
34	Warmer blanket (Conductive warming device)	N/A	1 No.
35	Civil & Electrical works	N/A	1 Job

## **SECTION VI**

### **Technical Specification**

#### **1. HOSPITAL ICU BED (FULLY AUTOMATIC) WITH MATTRESS**

##### **Technical Specifications:**

- ☐ The Fowler bed with mechanically operated back rest and knee by super-smooth crank mechanism by actuator.
- ☐ The ICU bed should be four piece individual side rails, ABS molded
- ☐ ABS Molded head and foot panel with locking and corner buffer.
- ☐ Advance linear actuator system 4 piece motor, 1 piece control box, 1 piece handset.
- ☐ Electrically operated intensive care bed using oil free electrical drives
- ☐ Body made of mild steel tubes (2mm) and CRCA sheet (18G)
- ☐ Dimension of the bed - 2075 mm X 910 mm
- ☐ Control circuit for bed movement along with master controls.
- ☐ Movements: Bed up / down movement, trendelenburg and reverse trendelenburg positions, backrest up/down and leg fowler movement.
- ☐ Movement operation by easily maneuverable hand held remote controller.
- ☐ Head & leg section tilting angle - upto 75 degrees.
- ☐ Trendelenburg & Reverse trendelenburg movement angle - upto 20 degree
- ☐ Lower limit of bed while downward movement - 410 mm
- ☐ Upper limit of bed while upward movement - 740 mm
- ☐ Removable head and leg rail boards
- ☐ Option for folding side rails
- ☐ Mobility of bed by four castor wheels (125 mm) with brakes.
- ☐ Should meet the National/International standards laid down such as ISO Certified manufacturer
- ☐ Freight saving knock-down construction.
- ☐ Mattress: Foam Mattress Plain, thickness 4" (10cm)
- ☐ Foam mattress comes in 4 sections
- ☐ Anti Bedsore Mattress
- ☐ It is covered with rexine closed with zip at one end
- ☐ Replaces the foul air & reduce growth of microbes.

#### **2. OVER BED TABLE**

- ☐ Over bed table should be made of rectangular frame work mounted on 5cm caster
- ☐ Size should be 30'' x 16'' laminated /Membrane

- ☐ Pressed top adjustable by Pneumatic gas spring
- ☐ Finish should be pre-treated and epoxy powder coated body
- ☐ Table top can be raised or lowered in infinite position between approx. 28'' – 45''
- ☐ Table top can be raised with slightest upward pressure

## **2. PEDIATRIC VENTILATORS**

### ☐ **Technical Specification: APPLICATION:**

- ☐ High end Ventilator system which incorporated with microprocessor system that provides various modes of ventilation to support **Neonate & Pediatric & Adults** in intensive care unit.
- ☐ Should be capable of ventilating ELBW new born less than 600 grams.

### **FEATURES:**

1. Ventilator should have more than 12 inch TFT/LCD
2. Waveforms and loops shall be color coded to denote inspiratory and expiratory breath phases.
3. Ventilator shall have integrated nebulizer port which is timed, delivers set FiO<sub>2</sub>, is volume compensated, and synchronized to inspiratory phase.
4. Ventilator only require single button to press for automatic measurement of high and low inflection point
5. The ventilator comes with STANDBY mode which allows the user to suspend the ventilator cycle.
6. The Tidal volume should be minimum 2 mL for neonatal mode and upto 2000ml.
7. The ventilator have three waveforms and at least two loops:
  - Pressure – Time Waveform
  - Volume – Time Waveform
  - Flow – Time Waveform
  - Pressure – Volume Loop
  - Flow – Volume Loop
8. The ventilator able to store up to at least two loops for reference.
9. The ventilator should only require 90 seconds for ventilator self test for circuit compliance, circuit resistant and oxygen sensor calibration.
10. Ventilator should have imported (same make) In-built/Integrated/External Medical Air Compressor, it should automatically start in case of air loss from pipeline. The Compressor should be USFDA and CE approved
11. Should conform to the international standards of European CE or USFDA for ventilator and compressor.

12. Ventilator should have internal battery standard, capable of powering ventilator and Compressor for minimum 30 minutes.
13. Expiratory Flow sensor should be covered under warranty and two Expiratory Flow sensor should be provided.
14. Transpulmonary Pressure Measurement (TPP) facility to determine optimal PEEP (Optional)

## **MODES**

### **1. Modes of Ventilation:**

- Assist Control with Pressure Control or Volume Control
  - SIMV with Pressure Control or Volume Control and Pressure Support
  - Nasal Continuous Positive Airway Pressure (nCPAP) with/without Pressure Support
  - Pressure Regulator Volume Control (PRVC)
  - Airway Pressure Release Ventilation (APRV) / BiPhasis / BiLevel
  - Time Cycle Pressure Limited (TCPL) Ventilation for Neonate
  - Artificial Airway Compensation (AAC) / Tube Compensation with Pressure Support in all the modes of ventilation
  - Non invasive ventilation for all the modes of ventilation
2. In Pressure Control mode, users are allowed to adjust the minimum tidal volume and have volume limit to avoid barotrauma or volume trauma, VG facility for Neonates with reusable proximal flow sensor.
  3. Apnea modes for ventilation shall include Pressure Controlled and Volume Controlled modes with user settable parameters
  4. Artificial Airway Compensation (AAC) should be able to adjust the diameter and length of the endotracheal tube to provide accuracy of setting.
  5. Ventilator shall have Synchronized Independent Lung Ventilation capability, preferred. (To be quoted as optional)
  6. Should have facility to field upgrade for Spo2 monitoring with display on the ventilator screen, preferred (To be quoted as optional)

### **ALARMS:-**

Alarms shall be color coded to distinguish High, Medium, and Low priority alarms Low and High Values of Respiratory, Oxygen Concentration, Power failure, High Pressure, leak, Apnea, Gas Supply Malfunction, Occlusion, Ventilator inoperability Alarms, Apnea alarm time delay shall be user adjustable.

### **Monitored Parameters:-**

Airway pressure peak, Tidal Volume inspired and expired and expired, minutes volume inspired and expired, spontaneous minute volume, total frequency, spontaneous frequency, FiO2, ETCO2, intrinsic PEEP, PEEP, Plateau pressure, Static and dynamic compliance & resistance, total leak, RSBI, NIF, MIP/P100.

## Primary Settings

<b>Rate:</b>	<b>1 to 120 bpm (neonatal)</b>
<b>Tidal Volume:</b>	<b>2.0 mL to 2000mL</b>
<b>Inspiratory Pressure:</b>	<b>0 to 80 cmH2O Neo,</b>
<b>Peak Flow:</b>	<b>0.5 to 140 L/min</b>
<b>Inspiratory Time:</b>	<b>0.2 to 5.0 sec</b>
<b>Pressure Support Ventilation (PSV):</b>	<b>0 to 80 cmH2O</b>
<b>PEEP:</b>	<b>0 to 50 cmH2O</b>
<b>Flow Trigger:</b>	<b>0.1 to 20 L/min</b>
<b>%O2</b>	<b>21 to 100%</b>

## The Ventilator should be supplied with essential accessories

- 1) The equipment should come with a warranty of 5 years from the date of satisfactory installation and 5 years comprehensive maintenance contract after the end of the warranty. Warranty and CMC should include all parts - plastic, metallic, glass, electronic, electrical and rubber. Warranty and CMC should cover the ventilator, compressor, humidifier, stand and any other parts. Warranty and CMC would include the periodic calibration of all parameters strictly as per manufacturer's recommendations and any spares, gases or standards required for that.
- 2) Rates of the chargeable accessories should be quoted for the total period 10 years (warranty and CMC) and should be frozen for that duration
- 3) Essential accessories to be supplied with the initial equipment supply:
  - a) Reusable ventilator circuits – 2 circuits each for neonates / pediatrics & adults
  - b) The unit should be supplied with stand alone heated humidifiers **servo controlled** (1 no.) US FDA approved (**MR 850 Fisher & Paykel preferred**) Control of the temperature based on the patient end temperature and gas flow rate in the circuit complete with all accessories to make it operational.
  - c) For each humidifier: Temperature probes (1 nos.), Humidifier chambers – reusable (2 nos.), heater wire adaptors suitable for both reusable and disposable circuits (1 nos.)
  - d) Test Lung for 1 each for neonates / pediatrics & adults.
  - e) Reusable Proximal Flow Sensor 2 nos, for Neonates if disposable then 30nos should be provided.
  - f) Expiratory Flow sensor 2 nos and should be covered under warranty.
- Power requirement: 220 V/50 Hz
- Power consumption: 100 W
- Device is produced by ISO certified manufacturer
- Device is safety certified according CE / FDA or equivalent.
- **Supplied with:**

- 5Nos. of ventilator circuits should be supplied along with the machine
- 1 x spare set of fuses
- User manual with trouble shooting guidance, in English
- Training and installation will be provided at end-user site.

#### **4 MULTIPARA MONITOR – (TYPE – 1)**

##### **General:**

- Parameters – ECG, heart rate, respiratory rate, SpO2, NIBP, Dual IBP, EtCO2, Dual Temperature.
- Should be Modular and capable of being connected to a central station.
- Cardiac output (minimum invasive with 1 modules)
- Cardiac output (noninvasive with 1 modules)
- It should have BP all,
- BIS -1, NMT – 1, EEG – 8 channel
- Should have central monitoring station remote access
- The equipment should come with all standard accessories required to run all parameters.
  - Waveform display: at least 12 channels at a time, user selectable.
  - Digital display: Heart rate, respiratory rate, oxygen saturation, temperature, Blood Pressure (systolic, diastolic, mean).
  - System should be compatible with HIS.
  - System should be US FDA or European CE approved for quality assurance.
  - Monitor must be able to connect to central monitoring station and should use single network for all kind of networking with the central station or other hospital information system (HIS). It should have dual display, one for continuous display of all beds and other for trend review, full disclosure etc.
- **Individual Monitors:**
  - Wall-mountable and pivotable for PICU.
  - Medical grade, TFT Flat screen, slim size, at least 19” display.
  - Flexible display mode for various monitoring needs.
  - Should be knob control and touch screen.
  - Viewing angle at least 90o.
  - Bigger font of numeric should also be available.
  - Should have standby mode for temporary leaving of patients.
  - Adjustable contrast and brightness. Should have facility to record data for individual patients identifiable by their name and hospital registration number

- **The following modules complete with their accessories for each monitor:**
  - Heart rate
  - ECG
  - Respiration
  - Oxygen saturation
  - Temperature: 2 ports
  - Non-invasive Blood pressure
  - Invasive blood pressure 2 ports
  - EtCO<sub>2</sub>
- **Heart rate/ECG:**
  - 10-lead selectable ECG
  - Built in arrhythmia monitoring in all leads
  - Inbuilt ST segment analysis and arrhythmia detection facility
  - Display of 2 ECG leads simultaneously at a time
  - Heart rate range 20-250 bpm
  - Accuracy  $\pm 5$  bpm
  - Display sweep speeds 12.5, 25 mm/sec (user adjustable)
  - Averaging time: user selectable up to 8 seconds
  - ECG amplitude user adjustable
  - Defibrillator protected
- **Respiratory rate**
  - Measured by transthoracic impedance using the same ECG lead
  - Range 0 to 150 breaths/min
  - Accuracy  $\pm 2$  bpm
  - Display sweep speeds 6.25, 12.5 & 25 mm/sec (user adjustable)
  - Averaging time: user selectable up to 8 seconds
  - User selectable apnea alarm time
- **Oxygen Saturation**
  - Masimo-SET/FAST Technology to take care of low perfusion states and motion artifacts
  - Dual wavelength LED pulse oximetry
  - Range 1 to 100%
  - SpO<sub>2</sub> accuracy :  $\pm 2$  % ( 70-100% range)
  - Averaging time: user selectable up to 8 seconds
  - Plethysmographic waveform display
  - System must display perfusion index (PI %) from SpO<sub>2</sub> as an indication of pulse strength at the sensor site.

- **Temperature**
  - 2-Channels
  - Continuous digital display of two site temperatures
- **Range: 25-50 degree Celsius**
  - Resolution:  $\pm 0.1$  degree Celsius Accuracy:  $\pm 0.1$  degree Celsius
  - Should provide skin temperature probe and rectal temperature probe for every monitor.
- **Non-invasive Blood pressure:**
  - Capable of measuring blood pressure including in Pediatric and Neonates weighing 500 g
  - Microprocessor software with unit in mmHg
  - Oscillometric technique
  - Manual, auto and time limited stat modes
  - User selectable automatic time intervals
  - Display systolic, diastolic and mean BP
  - Blood pressure range
    - Systolic : 30-250 mm Hg
    - Diastolic : 10-200 mm Hg
    - Mean: 20 – 100 mmHg
  - Pulse rate range : 20-250 bpm
  - Cuff : auto deflate with over pressure protection
  - Should automatically establish zero reference after each reading
- **Invasive Blood pressure**
  - At least 2 channels
  - Compatible with reusable and disposable pressure transducers
  - Transducer should allow continuous infusion into the artery through an infusion pump while pressure is simultaneously displayed
  - Input through pressure transducer that functions through a fluid filled catheter system
  - Unit: mmHg
  - Should allow continuous fluid infusion into the artery /vein through an infusion pump without any volume limitation
  - Compatible with arterial BP, CVP and intracranial pressure monitoring catheters with user selectable display names
  - Range 0-350 mmHg
  - Display resolution:  $\pm 1$  mmHg
  - Accuracy  $\pm 1$ mmHg
  - Digital waveform display

- User selectable pressure channel display
- Should be Compatible with ICP monitoring system
- Name of manufacturer of compatible ICP monitoring system should be provided with documentary evidence.
- Monitor must measure dynamic preload parameters such as pulse pressure variation (PPV) and systolic pressure variation (SPV) from arterial waveform and display on main screen.)
- **EtCO<sub>2</sub>**
  - Should provide mainstream modules-1no and microstream – 1 no.
  - Warm up time: capnogram displayed in less than 15 sec
  - Measurement method: infrared spectrum • Unit: %, mmHg, kPa
  - CO<sub>2</sub> Accuracy: +/- 2.0 mmHg
  - Measurement range: 0-150 mmHg
  - Resolution: 1 mmHg • Resp rate accuracy +/- 1 rpm
  - Range of resp rate measurement: 0-150/ min
  - Should also be able to monitor Etco<sub>2</sub> by non-invasive (nasal) way from the same module.
- **EEG**
  - EEG module should be interchangeable with any of the monitors Input: 6 lead
  - Sensitivity: 20, 50,100,250/ $\mu$ V/cm
  - Display: Left or right sided waveform
  - Small, cup type EEG electrodes and lead set kit suitable for neonatal use with a low impedance
- **User selectable alarms**
  - High and low heart rate
  - High and low respiratory rate
  - Apnea with adjustable time 5-20 seconds
  - High and low saturation • High and low SBP
  - High and low DBP
  - High and low MAP
  - Probe failure
  - Poor signal
  - Power failure
  - Audio & visual alarms with message with separate alarm indicator with 3600 viewing.
- **Trends**
  - Memory storage : at least 72 hours
  - Data display interval : not more than 20 sec
  - Display range : last ½ hour to 72 hours

- Graphical and tabular format of display of variables
- Full waveform disclosure of 24 hrs.
- **Power**
- **o 220/240 V 50/60 Hz AC**
- Rechargeable internal / external battery with a backup of at least 1 hr
- Manuals: One set of operator & service manuals with each monitor
- Availability of spares for at least 10 years after date of installation
- Warranty and CAMC: Comprehensive warranty and CAMC would include all parts- plastic, metallic, glass, batteries and rubber except the consumable accessories.
- Comprehensive warranty and CAMC would include periodic checking and periodic calibration of all parameters strictly as per manufacturer's recommendations (at least every 3 month) and any spares, gases or standards required for that.
- Should have online and telephonic registration of the complaints
- Should have resident service engineer in Raipur and should be available 24 x 7 to solve the complaints.
- The following quantities are to be supplied for every monitor with the initial order:
- ECG/Respiration
- ECG patient cable : 2
- Reusable ECG lead wires set : 2 sets Oxygen saturation
- Patient extension cables: 2
- Reusable neonatal wrap around probes: 4
- Reusable pediatric clip/ finger probes: 4 Temperature
- Reusable surface (skin) temperature probes: 2
- Reusable rectal temperature probes: 2 NIBP
- Patient extension cable – 2
- Disposable NIBP cuffs suitable for Pediatric and Neonates, children and adults (2000g, pediatric, adolescent and adult): 5 no of each size IBP
- Transducer connecting cables: 2
- Reusable pressure transducer: 5
- Disposable pressure dome kit with neonatal flush device:
- One set of operator & service manuals with each monitor
- FDA (USA) or CE certificate must be enclosed.
- **General**
- Should be able to remotely access the patient monitoring system via internet
- System should be compatible with HIS and be HL-7 compliant

- Ready to run web based applications like HIS, PACS, RIS, LIS etc on
- Patient monitor screen itself without need of additional server/PC/gateway hardware and software as standard supply.
- License should be provided for at least 2 users.
- Should provide with sturdy good quality stand to mount on wall.
- **Supplied with:**
  - 20 x Supplied with disposable ECG electrode
  - 1 x reusable SpO2 sensors, clip-on type and wrap (including connection cable)
  - Installation and Training should be given at end-user site.
  - User manual with trouble shooting guidance, in English.

## **5. MULTIPARA MONITOR – (TYPE- II)**

### **General:**

- Parameters – ECG, heart rate, respiratory rate, SpO2, NIBP, Dual IBP, Dual Temperature.
- Should be Modular and capable of being connected to a central station.
- It should have BP all,
- Should have central monitoring station remote access
- The equipment should come with all standard accessories required to run all parameters.
- Waveform display: at least 12 channels at a time, user selectable.
- Digital display: Heart rate, respiratory rate, oxygen saturation, temperature, Blood Pressure (systolic, diastolic, mean).
- System should be compatible with HIS.
- System should be US FDA or European CE approved for quality assurance.
- Monitor must be able to connect to central monitoring station and should use single network for all kind of networking with the central station or other hospital information system (HIS). It should have dual display, one for continuous display of all beds and other for trend review, full disclosure etc.
- **Individual Monitors:**
  - Wall-mountable and pivotable for PICU.
  - Medical grade, TFT Flat screen, slim size, at least 19” display.
  - Flexible display mode for various monitoring needs.
  - Should be knob control and touch screen.
  - Viewing angle at least 90o.
  - Bigger font of numeric should also be available.
  - Should have standby mode for temporary leaving of patients.

- Adjustable contrast and brightness. Should have facility to record data for individual patients identifiable by their name and hospital registration number
- **The following modules complete with their accessories for each monitor:**
  - Heart rate
  - ECG
  - Respiration
  - Oxygen saturation
  - Temperature: 2 ports
  - Non-invasive Blood pressure
  - Invasive blood pressure 2 ports
  - EtCO<sub>2</sub>
- **Heart rate/ECG:**
  - 10-lead selectable ECG
  - Built in arrhythmia monitoring in all leads
  - Inbuilt ST segment analysis and arrhythmia detection facility
  - Display of 2 ECG leads simultaneously at a time
  - Heart rate range 20-250 bpm
  - Accuracy  $\pm 5$  bpm
  - Display sweep speeds 12.5, 25 mm/sec (user adjustable)
  - Averaging time: user selectable up to 8 seconds
  - ECG amplitude user adjustable
  - Defibrillator protected
- **Respiratory rate**
  - Measured by transthoracic impedance using the same ECG lead
  - Range 0 to 150 breaths/min
  - Accuracy  $\pm 2$  bpm
  - Display sweep speeds 6.25, 12.5 & 25 mm/sec (user adjustable)
  - Averaging time: user selectable up to 8 seconds
  - User selectable apnea alarm time
- **Oxygen Saturation**
  - Masimo-SET/FAST Technology to take care of low perfusion states and motion artifacts
  - Dual wavelength LED pulse oximetry
  - Range 1 to 100%
  - SpO<sub>2</sub> accuracy :  $\pm 2\%$  ( 70-100% range)
  - Averaging time: user selectable up to 8 seconds
  - Plethysmographic waveform display

- System must display perfusion index (PI %) from SpO2 as an indication of pulse strength at the sensor site.
- **Temperature**
  - 2-Channels
  - Continuous digital display of two site temperatures
- **Range: 25-50 degree Celsius**
  - Resolution:  $\pm 0.1$  degree Celsius Accuracy:  $+ 0.1$  degree Celsius
  - Should provide skin temperature probe and rectal temperature probe for every monitor.
- **Non-invasive Blood pressure:**
  - Capable of measuring blood pressure including in Pediatric and Neonates weighing 500 g
  - Microprocessor software with unit in mmHg
  - Oscillometric technique
  - Manual, auto and time limited stat modes
  - User selectable automatic time intervals
  - Display systolic, diastolic and mean BP
  - Blood pressure range
  - Systolic : 30-250 mm Hg
  - Diastolic : 10-200 mm Hg
  - Mean: 20 – 100 mmHg
  - Pulse rate range : 20-250 bpm
  - Cuff : auto deflate with over pressure protection
  - Should automatically establish zero reference after each reading
- **Invasive Blood pressure**
  - At least 2 channels
  - Compatible with reusable and disposable pressure transducers
  - Transducer should allow continuous infusion into the artery through an infusion pump while pressure is simultaneously displayed
  - Input through pressure transducer that functions through a fluid filled catheter system
  - Unit: mmHg
  - Should allow continuous fluid infusion into the artery /vein through an infusion pump without any volume limitation
  - Compatible with arterial BP, CVP and intracranial pressure monitoring catheters with user selectable display names
  - Range 0-350 mmHg
  - Display resolution:  $\pm 1$  mmHg

- Accuracy  $\pm 1\text{mmHg}$
- Digital waveform display
- User selectable pressure channel display
- Should be Compatible with ICP monitoring system
- Name of manufacturer of compatible ICP monitoring system should be provided with documentary evidence.
- Monitor must measure dynamic preload parameters such as pulse pressure variation (PPV) and systolic pressure variation (SPV) from arterial waveform and display on main screen.)
- **User selectable alarms**
  - High and low heart rate
  - High and low respiratory rate
  - Apnea with adjustable time 5-20 seconds
  - High and low saturation • High and low SBP
  - High and low DBP
  - High and low MAP
  - Probe failure
  - Poor signal
  - Power failure
  - Audio & visual alarms with message with separate alarm indicator with 3600 viewing.
- **Trends**
  - Memory storage : at least 72 hours
  - Data display interval : not more than 20 sec
  - Display range : last ½ hour to 72 hours
  - Graphical and tabular format of display of variables
  - Full waveform disclosure of 24 hrs.
- **Power**
  - Rechargeable internal / external battery with a backup of at least 1 hr
  - 220/240 V 50/60 Hz AC
  - Manuals: One set of operator & service manuals with each monitor
  - Availability of spares for at least 10 years after date of installation
  - Warranty and CAMC: Comprehensive warranty and CAMC would include all parts- plastic, metallic, glass, batteries and rubber except the consumable accessories.
  - Comprehensive warranty and CAMC would include periodic checking and periodic calibration of all parameters strictly as per manufacturer's recommendations (at least every 3 month) and any spares, gases or standards required for that.

- Should have online and telephonic registration of the complaints
- Should have resident service engineer in Raipur and should be available 24 x 7 to solve the complaints.
- The following quantities are to be supplied for every monitor with the initial order:
- ECG/Respiration
  - ECG patient cable : 2
  - Reusable ECG lead wires set : 2 sets Oxygen saturation
  - Patient extension cables: 2
  - Reusable neonatal wrap around probes: 4
  - Reusable pediatric clip/ finger probes: 4 Temperature
  - Reusable surface (skin) temperature probes: 2
  - Reusable rectal temperature probes: 2 NIBP
  - Patient extension cable – 2
  - Disposable NIBP cuffs suitable for Pediatric and Neonates, children and adults (2000g, pediatric, adolescent and adult): 5 no of each size IBP
  - Transducer connecting cables: 2
  - Reusable pressure transducer: 5
  - Disposable pressure dome kit with neonatal flush device:
- One set of operator & service manuals with each monitor
- FDA (USA) or CE certificate must be enclosed.
- **General**
  - Should be able to remotely access the patient monitoring system via internet
  - System should be compatible with HIS and be HL-7 compliant
  - Ready to run web based applications like HIS, PACS, RIS, LIS etc on
  - Patient monitor screen itself without need of additional server/PC/gateway hardware and software as standard supply.
  - License should be provided for at least 2 users.
  - Should provide with sturdy good quality stand to mount on wall.
- **Supplied with:**
  - 20 x Supplied with disposable ECG electrode
  - 1 x reusable SpO2 sensors, clip-on type and wrap (including connection cable)
  - Installation and Training should be given at end-user site.
  - User manual with trouble shooting guidance, in English.

## **6. ECG MACHINE**

- **Description of Function:** ECG Machine is a primary equipment to record ECG Signal in various configurations. 12 channels with interpretation is required for recording and analyzing the waveforms with an inbuilt software.
- **Operational Requirements** The ECG Machine should be able to acquire all 12 Leads simultaneously and interpret them.
- **Technical Specifications**
  - Should acquire simultaneous 12 lead ECG for both adult and pediatric patients.
  - Should have Real time Colour display of ECG waveforms with signal quality indication for each lead.
  - Should have Artifact, AC, and low and high pass frequency filters.
  - Should have a storage memory of at least 100 ECGs with easy transfer by modem and data card.
  - Should have full screen preview of ECG report for quality assessment checks prior to print.
  - Should have interpretation facility of the amplitudes, durations and morphologies of ECG waveforms and associated rhythm for adult and pediatric patients.
  - Should have alphanumeric Keyboard for patient data Entry. (Virtual or hard keys).
  - Should have High resolution (200 dpix500dpi on 25 mm/sec speed) digital array A4 size printer.
  - Should have report formats of 3 x4; 6 x2, Rhythm for up to 12 selected leads; 12 Lead Extended measurements, 1 minute of continuous waveform data for 1 selected lead.
  - Should have battery capacity of at least 30 ECGs or 30 minutes of continuous rhythm recording on single charge.
  - Should be able to be connected to HIS /LAN/Wireless LAN.
  - Should display ECG on LCD/TFT Display of 640x480 pixel resolution.
  - USB Support for Storage on external portable memories.
  - Multimode of ECG Storage capability, 150 ECG on Internal Flash Memory.
  - System Configuration Accessories, spares and consumables
  - ECG Machine 12 Leads with Interpretation - 01
  - Patient Cable - 02
  - Chest Electrodes Adult-(set of six) -02 sets.
  - Chest Electrodes Pediatric-(set of six) -02 sets
  - Limb Electrodes(set of 4)- 02 sets of Adult and 02 sets of Pediatrics
  - Thermal Paper A4 Size for 500 patients

- Environmental factors
- The unit shall be capable of being stored continuously in ambient temperature of 0 - 50deg C and relative humidity of 15-90%
- The unit shall be capable of operating continuously in ambient temperature of 10 -50deg C and relative humidity of 15-90%
- Shall meet IEC-60601-1-2:2001(Or Equivalent BIS) General Requirements of Safety for Electromagnetic Compatibility or should comply with 89/366/EEC; EMC-directive.
- Power Supply
- Power input to be 220-240VAC, 50Hz fitted with Indian plug
- Standards, Safety and Training
- Should be US FDA or European CE, approved product.
- Electrical safety conforms to standards for electrical safety IEC-60601-1 General Requirements and IEC-60601- 2-25 Safety of Electrocardiograms. (OR EQUIVALENT BIS Standard)
- Documentation
- User Manual in English
- Service manual in English
- List of important spare parts and accessories with their part number and costing.
- Machine should be supplied with 100 disposable ECG electrodes

## **7. STRETCHER ON TROLLEY**

- Overall approximate dimension: 1830 mm x 555 mm x 820 mm, 72" x 22" x 32" (L x W x H).
- Mild steel tubular framework mounted on four swivel castors, 200 mm (8") diameter without brake.
- X-ray permeable removable stretcher top in two section made of pre-laminated board supported on tubular frame.
- Backrest on ratchet. Fitted with swing away type mild steel epoxy powder coated railing.
- Oxygen cylinder holder & M.S. storage tray Stainless steel I.V. rod with two provisions.
- Safety belts provided. Safe working load of 135 kgs and patient load bearing capacity of 105kgs.
- Pre-treated and powder coated finish. Supplied in KDC.
- Rexene covered mattress of 25 mm (1") thickness (1752)

## **8.BIPAP MACHINE**

- **Technical Specifications:**

- Bi-level positive airway pressure (BiPAP) can mean the difference between compliance and noncompliance for patients struggling to adapt to CPAP therapy. It emulates natural breathing through pressure relief, for an enhanced level of comfort.
- BiPAP stands for Bi-level Positive Airway Pressure. It is a breathing apparatus that helps people get more air into their lungs.
- It should makes BiPAP therapy more like natural breathing by delivering pressure relief.
- Should be state-of-the-art data management and reporting system automatically gathers vital patient information.
- It should be suitable for Adult and Paediatric patients over 13 Kg of body weight.
- It should use a high performance turbine flow generator for better pneumatic performance.
- It should have an LCD monitor.
- It should have monitoring facility for Tidal Volume, RR, Minute ventilation, I:E ratio, Leakage.
- Should have Assured Tidal volume delivery using pressure-support.
- Should be provided with a easy to carry travel bag.
- Accessories: Power cord, silicon Reusable (Autoclavable) 2 small size Full face masks, 2 medium size Full face masks, 1 large size Full face mask and 2 medium size nasal masks.
- It should be supplied with integrated Heated Humidifier.
- Operating pressure range. 4 to 30 cm H<sub>2</sub>O
- Pressure measurement tolerance +0.5cm H<sub>2</sub>O + 4% of the measured reading
- MODES: - S, ST, T ,PC, Volume Assured Pressure Support (to ensure Alveolar ventilation) IPAP - 4 to atleast 30 cm H<sub>2</sub>O (measured at the mask) EPAP – 4 to atleast 25 cm H<sub>2</sub>O (measured at the mask)
- CPAP mode 4 to 20cm H<sub>2</sub>O (measured at the mask) e Sensitivity settings(automatic/manual) Should have different trigger & cycle settings.
- Backup Respiratory rate 5 to 30 BPM adjustable g Ti Control Ti Max 0.3 – 3 seconds.
- Peak flow capacity >150 LPM at 20 cm H<sub>2</sub>O.
- Alarms Range of Alarms
- RAMP Feature 0-45 minutes
- Should be provided with a easy to carry travel bag.
- Accessories: Power cord, silicon Reusable (Autoclavable) 2 small size Full face masks, 2

medium size Full face masks, 1 large size Full face mask and 2 medium size nasal masks.

- It should be supplied with integrated Heated Humidifier.
- Upgradeable to SpO2 Module & Data Module.
- Should have a provision to download data via cable or SD card.
- Automatic leak detection and compensation for atleast 30 Litres.
- Supplied with a set of patient tubings, mains leads and carry bag. The filter should be washable and reusable. The tubes should be preferably heating tubes.
- In case of malfunction/breakdown, the company should provide temporary back-up support within 48 hrs of registering the complaint till the time machine is repaired and returned.
- The company should give the certificate that the model quoted is the latest and not obsolete; and spares will be easily available for next 5-7 years.
- System should be supplied with all reusable accessories
- Shall meet IEC-60601-1-2 :2001(Or Equivalent BIS) General Requirements of Safety for Electromagnetic Compatibility. or should comply with 89/366/EEC; EMC-directive.
- The unit shall be capable of operating continuously in ambient temperature of 20-30 deg C and relative humidity of 15-90%
- Power input to be 220-240VAC, 50Hz fitted with Indian plug
- Should be FDA, CE, UL or BIS approved product
- Manufacturer should have ISO certification for quality standards.
- User/Technical/Maintenance manuals to be supplied in English.
- List of important spare parts and accessories with their part number and costing.
- Certificate of calibration and inspection.
- Installation and Training at end-user site.

### **9.SYRINGE PUMP 10, 20, 50ml**

#### **Essential**

- Microprocessor controlled pump capable of propulsion of fluids accurately.
- Syringe compatibility: The pump should work with different brands of syringes and is able to accept syringes with volumes of 10 ml – 50 ml.
- There should be automatic detection of syringe size
- It should be equipped for detecting correct fixing of syringe.
- Flow rate should be adjustable from 0.1 ml/hr to 1000 ml/hr.
- Flow rate should be adjustable in increments of 0.1 ml/hr.

- Flow rate adjustment should not involve stopping of the existing infusion rate.
- The accuracy of flow rate should be  $\pm 2\%$ .
- The flow rate should be displayed in ml/ hr. Delivery rate can be calculated automatically by presetting of volume & time. It should also accept values in mg/ hr,  $\mu\text{g/ hr}$ , mg/ kg/ hr etc. 10. It should be able to deliver bolus dose in automatic/ manual mode.
- Pump should have commonly used drugs library of 40 or more.
- It should work on 200 – 240 VAC, 50 – 60 Hz source and in-built rechargeable battery.
- Internal battery life should be minimum of 6 hrs.
- Pump should have colour display.
- The following audio and visual alarms should be incorporated:
  - Main changeover to battery indication
  - Occlusion pressure alarm
  - Near empty syringe
  - Low battery
  - Standby alarm
- There should be a method of automatic bolus volume reduction after occlusion release.
- The pump should be waterproof so that fluid should not enter inside the pump in case of accidental spillage.
- The syringe pumps should be capable of standalone functioning as well as being fixed on a frame/platform/stand.
- The pump should be CE certified or US FDA approved.

### **10. INFUSION PUMP**

- Volumetric Infusion pumps
- Pump should have a maximum flow rate of 1200 ml/hr
- Min flow rate should be 0.1 ml/hr
- Should have facility for online titration
- Should have long battery life (15 Hrs at 125 ml/Hr )
- Should be small and portable
- Should accept all standard IV sets
- Should have facility for infusing Rate /Volume and Volume /Time
- Pump should display Rate, Volume infused and Volume to be Infused
- Pump should have additional programme for 3 or more step infusion for Continuous rate and time adjustments
- Pump should be of Piston pumping mechanism

- Flow rate accuracy should be plus or Minus 5% of set rate
- The infusion pumps should be capable of standalone functioning as well as being fixed on a frame/platform/stand.
- Should have an additional LED Display for distant Viewing
- The pump should be CE certified or US FDA approved.

### **11. PUMP SUCTION PORTABLE**

- Portable suction pump with 1or 2 litre plastic jar
- Dismantable for easy cleaning, jar autoclavable.
- Shock resistance protects from dropping
- Light, easy to carry and keep clean
- Jar with plastic cover, gasket and overflow valve
- With suction regulator, vacuum gauge
- Suction power: 15 L/min
- Vacuum, max: 600 mmHg
- Power requirement: 220 V/50 Hz
- Power consumption: 100 W
- Device is produced by ISO 9001 certified manufacturer
- Device is safety certified according CE or FDA or equivalent.
- User manual with trouble shooting guidance, in English
- Training and installation at end-user site.

### **12. SPOT LAMP (EMERGENCY LIGHT).**

- The spot lamp is required for doing minor clinical procedure in an emergency, ICU or PICU, OT, O&G etc., environment and the system can be moved from place to place.
- It should be flexible gooseneck arm with height adjustable pole.
- Cast full stainless steel base stand with anti-static swivel 5 castors wheels.
- The light combination singe spot Halogen bulb or LED lights.
- Light intensity of the spot lamp should be 25,000K LUXat 0.5m distance.
- Colour rendering index R (a) minimum 95
- Diameter of light field size should be minimum 9cm
- Halogen light should be 12V/35watts or 12V/20watts or equivalent LED lights also ok
- Lamp life should be minimum 1000 hrs
- Power consumption of the spot lamp should be <40w

- Dynamically balanced mobile spot light with well-balanced spring arm up & down movement.
- Power input requirement should be 220-240V/50 Hz fitted with Indian plug
- Device is produced by ISO certified manufacturer
- Device should have ISI safety certificate from approved agency
- Device is safety certified according CE/FDA or equivalent
- User manual with trouble shooting guidance, in English
- Installation and Training at end-user site.

### **13. GLUCOMETER WITH DEXTROSTIX WITH 100 STRIPS**

- Should be a hand held meter
- Should require no routine maintenance
- Should have reading range/linearity from 10 to 600 mg/dl
- Should have a maximum reading time of less than 10 seconds
- Should use electrochemical technology
- Should use a minimum blood sample less than 1.5µl
- Should have a LCD display
- Should have measuring unit in mg/dl.
- Should have wide operating temperature
- Should have a minimum memory of 50
- Should have life time replacement offer
- Should have automatic code entry technique
- Battery should be replaceable without using any tools.
- Should have facility to ensure accuracy of measurements.
- Glucometer with 100 Strips.
- Long lasting Battery operated.
- User manual with trouble shooting guidance, in English
- Should be USFDA/CE certified.

### **14. PEADIATRIC WEIGHING SCALE WITH STADIOMETER**

- **Technical Specifications:**
- Pediatric weighing scale with Stadiometer should be high precision mechanism
- Pediatric weighing capacity should be approx. 0.5kg to 100 kg
- Reading time max 5 seconds

- Display should be wide window for clear & better visibility
- Contemporary stand or fixed type design
- Should be robust construction
- Should provide accurate reading
- Device is produced by ISO certified manufacturer
- **Supplied with:**
- User manual with trouble shooting guidance, in English
- Installation and training at end-user site

## **15. NAPPY WEIGHING SCALE. DIGITAL**

- **Technical Specifications:**
- Nappy weighing scale for Pediatric/Neonate electronic type, which should weigh 10 gram to 10kg, with resolution up to 2grams, which is used for weigh diapers of the Pediatric / Neonates / Newborn / Infant patient.
- Weighing scale should have tare function
- On switch and auto-off
- Should be robust construction
- Should provide accurate reading
- Wide window for clear & better visibility
- Device is produced by ISO certified manufacturer
- **Supplied with:**
- User manual with trouble shooting guidance, in English
- Installation and Training at end-user site.

## **16. STETHOSCOPE FOR PEDIATRIC**

- Double cup Pediatric stethoscope
- Chest piece in stainless steel with non-chill plastic rim
- Diaphragm approx: 20 mm
- Sensitivity approx 3.0 dB from 50 to 500 Hz (cardio)
- Sensitivity approx 8.0 dB from 600 Hz to 1500 Hz (pneumo)
- Y tube: treated rubber with large diameter
- Arms: stainless steel or chrome brass, with treated spring for lasting elasticity and comfort
- Removable plastic ear-pieces
- Device is produced by ISO certified manufacturer.
- User manual with trouble shooting guidance, in English.

### **17. (BP APPARATUS) SPHYGMOMANOMETER PEDIATRICS (AIR TYPE, HEINE TYPE)**

- It should be shockproof, Latex-free, Exclusive pressure-distribution system. Pressure- proof manometer for Pediatric use only.
- Chest piece in stainless steel with non-chill plastic rim
- It should have large diameter scale. 56 mm diameter black-on-white scale is easy to read. With high quality indicator. Precisely calibrated, durable and shock resistant. Large insufflation bulb. 50 % larger bulb volume for fast inflation of the cuff. Exclusive air- release valve. Provides fine and precise air release rate adjustment, quick deflation, and extreme durability. A rubber-stop prevents valve-lock. Upper housing made of aluminium alloy with a shock absorbing ring protecting indicator and glass. Lower housing is moulded of shockproof plastic with shock absorbing, anti-slip coating.
- Should be high quality, single-tube cuff with velcro fastener. Washable. Adjustable spoon (plastic). For both right or left-handed operation.
- It should be robust double-walled construction with a unique triple manometer mount gives ideal protection against shocks, comfortably exceeding both the European EN1060 and the American SP9 tests.
- The BP apparatus valve construction provides ideal air pressure conditions to absorb pressure peaks in the air flow to the manometer during inflation. This advantage was only possible until now with twin-tube systems.
- Device is produced by ISO certified manufacturer.
- User manual with trouble shooting guidance, in English.

### **18. LARYNGOSCOPE SET WITH ALL BLADES**

- Laryngoscope set with all blades
- Constituted of large hollow, cylindrical, slightly ribbed handle and a set of depressors in SS
- Handle is made of either chromium-plated or stainless steel and can be opened at an extremity to insert two alkaline batteries (LR14, size C, 1.5 Volts). The other end has a stud contact which fits the various sizes and types of depressors.
- 2 x curved depressors, Macintosh type No. 1, approx 68 mm lengths with halogen bulb
- 2 x straight depressors, Miller type No. 0, approx 53 mm length with halogen bulb
- Presented in suitable protective plastic box
- Device is produced by ISO certified manufacturer

- Device is safety certified according CE, FDA or equivalent.
- User manual with trouble shooting guidance
- Supplied with packed bag.

### **19. RESUSCIATOR HAND-OPERATED 250ML**

- Resuscitator for manual ventilation of pediatric 250ml
- Ventilation can be done with ambient air or with oxygen
- Resuscitator can be totally disassembled, is easy to clean, disinfect and sterilize
- All parts can be autoclaved at 120°C (except O2 reserve bag)
- Manufactured from durable high-strength synthetic not requiring special maintenance or storage
- Resuscitator is supplied as a complete set in a box
- Compressible self-refilling ventilation bag, capacity, approx. 250 ml
- With non-re breathing patient valve with pressure limitation
- Intake valve with nipple for O2 tubing
- O2 reserve bag complete, capacity approx.: 800 ml
- 2 Nos of cushioned Pediatric and Neonate size masks, translucent of each (Size “0”, approx: 50 mm)
- Device is produced by ISO certified manufacturer
- Device is safety certified according CE, FDA or equivalent.
- User manual with trouble shooting guidance, in English.

### **20. RESUSCIATOR HAND-OPERATED, PEDIATRICS 500ML**

- Resuscitator for manual ventilation of Pediatrics
- Ventilation can be done with ambient air or with oxygen
- Resuscitator can be totally disassembled, is easy to clean, disinfect and sterilize
- All parts can be autoclaved at 120°C (except O2 reserve bag)
- Manufactured from durable high-strength synthetic not requiring special maintenance or storage
- Resuscitator is supplied as a complete set in a box
- Compressible self-refilling ventilation bag, capacity, approx. 500 ml
- With non-re breathing patient valve with pressure limitation
- Intake valve with nipple for O2 tubing
- O2 reserve bag complete, capacity approx.: 2000 ml

- 2Nos of cushioned Pediatric and Neonate size masks, translucent of each (Size“0”, approx:50 mm)
- Device is produced by ISO certified manufacturer
- Device is safety certified according CE, FDA or equivalent.
- User manual with trouble shooting guidance, in English.

## **21. RESUSCIATOR HAND-OPERATED, PEDIATRICS 1000ML**

- Resuscitator for manual ventilation of Pediatrics
- Ventilation can be done with ambient air or with oxygen
- Resuscitator can be totally disassembled, is easy to clean, disinfect and sterilize
- All parts can be autoclaved at 120°C (except O2 reserve bag)
- Manufactured from durable high-strength synthetic not requiring special maintenance or storage
- Resuscitator is supplied as a complete set in a box
- Compressible self-refilling ventilation bag, capacity, approx. 1000 ml
- With non-re breathing patient valve with pressure limitation
- Intake valve with nipple for O2 tubing
- O2 reserve bag complete, capacity approx.: 2000 ml
- 2 Nos of cushioned Pediatric and Adult size masks, translucent of each (Size approx: 50 mm)
- Device is produced by ISO certified manufacturer
- Device is safety certified according CE, FDA or equivalent.
- User manual with trouble shooting guidance, in English.

## **22. HUB CUTTER, SYRINGE**

- **Material used will have:**
- The cutting blade of the cutter will be made of stainless steel.
- The thickness of the blade will not be less than 0.5 mm with one side sharpen to cut minimum of 5,000 cuts.
- All other metal if used in the hub cutter will be made of galvanized carbon steel which will withstand rusting even in rough weather with high humidity coastal region for a minimum of two year (IS 277 of 2003 – galvanized steel sheet specification).
- The spring if used in the hub cutter will be made of steel wire for mechanical spring (oil harden and tampered steel wire)

- The sharp container should be made of Polypropylene (PP) of not less than 4 mm thick and should be white/translucent. The material should be autoclavable plastics, puncture resistant, high drop impact strength, material should be non-toxic and pyrogen free, the material will not wear out with normal usage.
- **Shape:** The shape of the container will be such that the lid is tightened with the body with a twist and cannot be opened by pulling the lid and the body in the opposite direction. The container containing the cut hub along with needle of various size will be  **$\frac{3}{4}$  full when filled with 200 cut hub with needles.**
- **Capacity range:** Able to destroy from hub of AD syringe with needles from 18-28 gauge diameter and from 10-25 mm length and fitted with all types of needle fittings, eg, fixed luer lock, luer ship of snap-on.
- **Resistance to piecing:** Container shall accept 200 cut needles along with the hub when it is  $\frac{3}{4}$ th full (filling line). Needles shall not penetrate container walls when filled up to the filling line. The average of forces needed to penetrate samples shall be not less than 15 N.
- **Tamper-proofing:** When contaminated needles are being dropped into the containers, it shall remain sufficiently sealed so as to prevent a hand from entering. Needle should not protrude from the container when the box contains 200 needles with hub.
- **Capacity of the container:** have sufficient capacity to hold 200, 18-28-gauge, and 10-25 mm long needles with hub.
- **Colour:** The container shall be translucent white in color and will allow visual inspection from outer surface to determine when the container is full.
- **Technique:** The device shall be designed to facilitate the location and entry of the needles so that the AD syringe is cut from hub by having.
- A non-critical angle of the needle relative to the entry point. an entry target area which is recessed, concave and diameter is such that it allows all type of AD syringe available in the market to cut from hub.
- **Handling:** Able to be carried in one hand and portable.
- **Durability:** The performance and safety of the device shall not be compromised by Exposure to ambient conditions of +43C, 90% relative humidity for one week.
- **Supplied with:**
- Device is produced by ISO 9001 certified manufacturer.  
User manual with trouble shooting guidance, in English.

### **23. CRASH CART – MODULAR**

- Frame work made from Polished SS Steel Material.
- Flat top of SS & at least 6 inch deep removable bucket at the bottom
- Should have multiple long drawers to hold drug strips made of polished SS sheet with corrosion free telescopic channels (At least 30 to 40 separate drawers – in about six to eight rows).
- The front of the each drawer should be half covered on which removable medicine label can be pasted and upper half open to see the contents inside.
- Mounted on four 100mm castors (Front Two with brake locking arrangement).
- Approx. Size: 750(L) x 450(W) x 850(H) mm.
- All the Stainless Steel should be seamless conforming to 304 grade/ 16 gauge and polished finished.
- Manufacturer should be ISO and/or 9000:1 and/or 14000:1 and/or 18000:1 and/or BIFMA certified.

### **24. USG CUM ECHO MACHINE FOR PEDIATRICS, (PORTABLE ULTRASOUND)**

- **General:** Portable Ultrasonograph, Doppler and Echo machine with Pediatric & Neonatal transducer/probe for cardiac, cranial, abdominal, vascular and neurological assessment.
- It should be non-invasive & portable
- It should be light weight, sturdy
- Architecture: All digital broadband with 128 channel
- Dynamic range up to 165 DB, gray scale 256 shades
- HIPAA compatible comprehensible tool set
- High resolution monitor with good image quality
- 2D/Velocity/Colour Doppler/M – Mode/PW,CW Doppler, ECG
- Dual imaging
- M-mode/Duplex imaging with 3-sweep speed
- 1/2:1/2, 1/3:1/3 and full screen option
- Broadband, multi-frequency, 2X pan/zoom and tissue harmonic imaging with 1-8 focal zones.
- Image processing for contrast, persistence, dynamic range and gain.
- Soft key for advance features
- Delta key for user assigned actions
- Alphanumeric QWERTY Keyboard

- Track pad with select key for easy navigation
- Doppler/M mode controls for angle, steer, scale, baseline, volume and gain
- Image acquisition keys to review, report, VCR and clip store
- System dynamic range of 140 dB (approx.) with up to 100 frames/second
- Store up to 10000 images with 1 GB flashcard
- RGB output to external LCD display
- Composite video output to VCR, video printer or LCD display
- Audio output with integrated speaker
- **Measure:** 2D, distance callipers, ellipse for area circumference, Doppler velocity RI and S/D ratio, volume flow calculation, M- mode, distance and time measurement, heart rate calculation, selectable text and body markers, application specific texts by function keys
- Both Pediatric & Neonatal phased array transducer/probe with band-width at least 4-8 MHz
- Splash-resistant inter phase
- Quick boot-up time
- Battery-power and wireless capabilities with internal memory
- Backlit keyboard
- Facility for electric data transfer and printer with training kit/CDs
- Weight less than 5kg (excluding stand)
- Machine should have Pediatric & ECHO, brain ultrasound and abdominal ultrasound packages with dedicated probes.
- ECHO probes footprint size appropriate for small children & neonates including those less 1kg
- Able to store still and video image in common file format such as JPEG, MPEG with hard disc of at least 50GB.
- Incorporated with software and hardware functionality to wired and wireless transfer and post-examination quantitative study all type of raw data on other window, Mac or Linus based systems.
- Advanced image optimization techniques for high quality imaging.
- At least 10 inch diagonal high resolution LCD
- Extremely high frames rates, enhanced color flow and color angio.
- Integrated software package for image data review, analysis, patient archive and reporting capabilities.
- CD/DVD writer, USB flash cards and high Quality color printer
- System operation by power or battery

- Ac universal power adapter 100-240 VAC, 50-60Hz input, 15VDC output
- Battery backup at least 1 hour
- Rechargeable battery should be lithium-ion battery
- **Probes:**
  - Wide-band multi-frequency phased array probe with bandwidth between 2.7 and 8.0 MHz.
  - Wide-band multi-frequency phased array probe with bandwidth between 5.0 and 11.0 MHz for pediatric echo.
  - Wide-band, multi-frequency micro convex array probe with bandwidth between 3.0 and 9.0 MHz for neonatal head and abdominal examinations
- **Medical grade color printer:**
  - 3-lead ECG module compatible with standard ECG leads and electrodes.
  - System should be provided with high quality compact stand with lockable wheels.
  - Onsite physical demonstration/training of the equipment to all the end user with all the requested facilities will be mandatory.
  - The equipment should ensure the supply of consumable and standard accessories for the period of warranty and CMC.
  - Items covered under CMC: Prices of consumables and accessories should be quoted separately in the financial bid for the entire period of warranty and CMC. Company should ensure the supply of consumable and accessories for the period of the warranty and CMC.
- **Documentation:**
  - User/Technician/Maintenance manual to be supplied in English
  - Certificate of calibration and inspection from factory.
  - General requirement for electrical safety of medical equipment
  - Supplier should have local services facility.
  - The Service provider should have the necessary equipment's recommended by the manufactures for installation and to carry out preventive maintenance test as per guidelines provided in the service/maintenance manual.

## **25. PEDIATRIC BRANCHOSCOPE FIBER OPTICS**

- Should have minimum 120° field of view.
- Should have a depth of field of 3 to 50 mm
- The insertion tube outer diameter should be 4.9mm, with field of view should be 120°
- Distal end diameter should be 4.9 mm
- Should have at least 180° upwards and 130° downwards angulations.
- Should have a working length of 600mm.

- Its Observation range should be 3-100 mm
- Should have an instrument channel of at least 2mm inner diameter.
- Total length of the scope should be 870 mm or more
- Should have a light guide illuminating system.
- Should be supplied with all standard accessories including different type of biopsy forceps, cleaning brushes and storage box.

#### **DIGITAL CAMERA SYSTEM DIGITAL CAMERA SYSTEM DIGITAL CAMERA SYSTEM**

- Should be a single chip camera technology.
- Should have two composite video outputs and one S-video output.
- Should have anti-moister filter for fiber scopes.
- Should have fully automatic exposure control.
- Should have automatic white balance with memory function.
- Should have horizontal resolution of more than 450 lines.
- Should provide compatible optical interface for the fiber bronchoscope supplied.
- Should be supplied with 15" CRT flat TV monitor (Model: LMD1530 Sony Medical Grade).
- Should work with input 200 to 240Vac 50 Hz supply.

#### **LIGHT SOURCE**

- Should be a halogen light source with minimum 150W light output.
- Should have manual light intensity control.
- Should have fan cooling system.
- Should have two lamps of 150W and should have provision to change over in the event of failure from one lamp to another.
- Should work with input 200 to 240Vac 50 Hz supply.

#### **OTHERS**

- Should be supplied with suitable trolley

### **26. INSTRUMENT TROLLEY**

- SS tubular frame work made of 25.4 mm OD x18G verticals mounted on 125mm dia. Non rusting castors two with brakes
- Castors to be made of high grade non floor staining synthetic materials with integrated thread guards. Wheel centres having precision ball bearing to run smoothly
- Two stainless steel shelves of 20G thickness with protective railings on 3 sides. The railings shall be made of dia. 10mm SS rod

- Only 304 grade SS should be used for trolley frame work and burr free SS shelves
- SS parts finished with Matt polish and must be supplied in SKD condition
- All process parameters to be as per documented IMS procedures for quality assurance must be compliant to ISO 9001:2008
- Manufacturer should be ISO and/or 9000:1 and/or 18000:1 and/or BIFMA certified.

#### **27. WALL CLOCK WITH SECOND HAND**

- Should be reputed brand and make
- Supplied with second hand
- With one battery
- Round or square in shape
- Light weight.

#### **28. DOUBLE DOOR REFRIGERATOR 250 LTRS WITH STAND & STABILIZER**

- Refrigerator should be reputed make: LG/Samsung/Whirlpool/IFB/Godrej
- Should be reputed brand and make double door refrigerator
- Capacity should be Approx.250 liters
- Should have a freezer compartment
- Should have automatic defrosting facility
- Should have five star electrical energy rating
- System accessories, Spares & Consumable
- Power Supply, power input to be 220-240 VAC, 50 Hz
- Supplied with stand and Stabilizer
- User manual with trouble shooting guidance, in English.

#### **29. AIR HANDLING UNIT (AHU) WITH HEPAFILTER WITH POSITIVE AIR PRESSURE & ONE ROOM WITH NEGATIVE PRESSURE WITH MINIMUM 20 TO 30 AIR CHANGES PER HOUR**

##### **Design Parameters**

Standard	: As per ISO 14644-1/ HTM/ ASHRAE standards
Class Level	: ISO 7
Temperature	: 23 Deg C ( +/- 2)
RH Level	: 55 % (+/- 5%)

Design consideration : After analyzing the site design and drawing of PICU facility as per ISO class 7 level with terminal HEPA design to enhance the air quality level, multiple stainless steel terminals will be provided based on the bed ratio and return air from the

bottom will be taken with riser for proper laminar effect. Other critical rooms will have a class level of ISO 8. The existing duct line needs to be removed, because it is not designed as per clean room duct velocity levels. A new duct line needs to be laid with appropriate return air velocity. We have designed based on return air design and not gone for 100% fresh air design considering the various downsides to it.

100% fresh air design should be considered only where it is mandatory. In ICU room design (as per international standards) it only helps in increasing the energy consumption substantially (even with heat recovery) thereby increasing running costs to a very high level, especially during summer. 100% Fresh air is an old design and with the advent change of superior filtration technology, Recirculation design is widely being used. Hepa filters will have very short life if 100% fresh air design is opted, which again will increase the running costs. A precisely designed Recirculation design with exact air ratio will be a fool proof system and the best option available for ICU Rooms.

Sl. NO	<b><u>SPECIFICATIONS</u></b>
1.	<p><b>CRFS</b> - Factory built package type classified environment system, suitable for aseptic application with built arrangement to produce thermo hygrometric conditions (Temperature, Humidity etc). Also it is suitable to control V.O.C positive pressure. This system is chilled water type with of cooling capacity and free air delivery of 24000 CFM with 150mm of water column air static. Unit made of panels consisting of hot dip G.I casing of thickness of 24 swg thick for both outside and inside layers encasing polyurethane foam insulation having a density of 38-40 Kg/cum factory injected by using injection molding machine. Unit equipped with EU 4, viscous washable synthetic type, bullet expanded inner grooved coil section of Direct Expansion, 6 Row deep for maximum dehumidification, and Aluminium fins with Hydrafillic coating, coil size shall be selected for a maximum face velocity of 500 feet/minute. Coils shall have automatic air vents, the vent outlets beings piped to the drain pan with a copper pipe. drain cock with valve with aluminium finned blower sections with DIDW blower with motor and drive assembly, belt driven package (V-Belt) with TEFC motor suitable for operations on 415 + 10%, 50 Hz, A.C supply with vibration isolator, fine filter section with EU 7 filter with 300mm thick, dampers to be of extruded aluminium low leakage aero file design. VFD for Continuous operation will be provided.</p>
2.	<p><b>Ducting &amp; Insulation</b> - Supply, installation, testing and balancing of Air Distribution System consists of factory fabricated Galvanized Iron sheet metal ducting with TDF/TDC flanges complete with supports (anchor fasteners and tie-rods, cradles, angle iron supports, GI bolts and nuts, 4mm thick self- adhesive neoprene rubber gasket, stiffeners, zinc chromate painted angle iron flanges, chipping and plastering of openings made for duct supports etc., filling the gap with fibre glass wool and with sealant complete as per specification. The rates quoted shall include turning vanes, straightening vanes, splitters, inspection doors probe, inlets with test openings enclosures complete with locking caps, chain, gaskets, insulating plugs, and extension for insulated ductwork etc. Supply and erection of Thermal Insulation - Material shall be FM approved, open cell Nitrile Rubber foam, temperature range from -10°C to +60°C, Class O fire category and as per specification. The Thickness of the insulation material shall be 13/19 mm.</p>

<b>3.</b>	<b>Negative Pressure System for Isolation Room :</b> Specially designed Negative pressure system for Isolation room where patients suffering from contagious diseases like measles, tuberculosis, small pox are kept. High pressure fan provides approximate 800 CFM will be inducted into the room and on both sides suction fan will take back approximate 1100 CFM which will be exhausted via HEPA Filter system.
<b>4.</b>	<b>HEPA Filter with stainless steel module :</b> The casing will be made out of Aluminium with Media made out of Micro fibre glass paper and the bonding will be of PU resin. Fins will be Aluminium fins – blended type. Poly ethylene Gasket will be provided. Pressure Drop will be Within 25mm WC . Performance Efficiency will be 99.997% and Grade will be H 13 / H 14 & Penetration - 0.3 sub micron. Terminal module made Stainless steel/Aluminum finish, with bottom grill out of Stainless steel grill with Glossy finish, H 13 HEPA Filter with precise bolt arrangement, will be encased in casing and fixed rigidly into the modular without airleaks. , also accessories such as air entry flange connection and D.O.P charging port. Designed for uniform laminar flow across the surface
<b>5.</b>	<b>Electrical Control Panel :</b> Electrical control panel consist of various sets of controllers and VFD. VFD is a general purpose drive which controls AC motors up to 22 KW with maximum reliability complies with RoHS directives. The drive is easy to install PLC controlled and with automatic motor adaptation technology with high efficiency.
<b>6.</b>	<b>Chilled water piping :</b> Chilled water piping with actuators and other arrangements will be provided as per site requirement with “C” class pipe of dia 65 / 75mm. Butterfly valve, flanges, thermometer, pressure gauge, Air vent, “Y” strainer with necessary f a s t e n e r s . Thermocole, bitumen & aluminum cladding shall be provided.
<b>7.</b>	<b>Testing &amp; Validation</b>  DQ, IQ, OQ & PQ Air velocity test Air changes test Air qty. check test Temp. & RH test  DOP test for Hepa filter  Particle count test Air flow pattern test Recovery test.

### **30. ONLINE UPS FOR ALL PICU BEDS WITH 30MINUTE BACKUP**

- Supply, Installation, Testing & Commissioning of Online UPS System at Paediatrics Intensive Care Unit (PICU) at AIIMS Raipur (Chattisgarh) as per below requirement.
- 60 KVA (384 VDC) 3 Phase Input – 3 Phase Output low iTHD double Conversion microprocessor controlled IGBT based True Online UPS System with 12V/100AH/32Nos SMF Battery with rack and accessories to provide 30minutes back up time.
- **The 60 kVA 3 PHASE ONLINE UPS SYSTEM:** Supply Installation Testing and Commissioning of Trueon line 60KVA UPS system. Inversion shall be Microprocessor controlled, with instantaneous sine wave control using IGBT. UPS shall have standard

display features, alarms, safeties, etc Rating : 60kVA Minimum Back up time : Continuous 30 Mins at full load Input Voltage range : A.C 235 V (+15% to -20%), 3 phase Input Frequency : 50 HZ (+/- 3HZ) Power Factor : 0.9 or above THD : less than 5% Ripple Voltage in battery terminal : less than 2% DC Voltage Rectifier shall be full wave type (Shall fully meet the specified input power requirements)

- **Battery Type :** SMFVAh, system minimum
- **Preferred makes:** - UPS: Numeric, APC, Emersson, Hykon, Consul or equivalent Batteries: Exide, Amaron, TATA or equivalent.
- Installation and Training should be given at end-user site.
- User manual with trouble shooting guidance, in English
- Should be ISI marked product.
- Device is produced by ISO certified manufacturer.

### **31. FULLY SS TABLES FOR ABG, ECG, EEG Etc...**

- Table should be made of heavy duty SS 304 pipe
- With SS 304 top with castor wheels locking facility and it should be vibration free
- Approx. size : 36"L x 24"H height 30"
- Should be ISO certified manufacturer.

### **32. DRESS HANGERS**

- These dress hangers should be standard as per the size and strong for hanging the doctors & staff dresses.

### **33. (HHHNFC) HEATED HUMIDIFIER MACHINE**

- The heated humidifier system is for optimum humidification and patient comfort.
- The system should provide optimal humidification to all intensive care patients, the systems should ensure the exceptional performance and safety, and the unique components combine to enhance, the care for patient requiring ventilator, NPPV, CPAP and oxygen support.
- Unit should provide and maintain optimal humidity and light weight breathing circuits should create less drag on patient connections.
- The system should include every component from ventilator to patient
- Unit chamber should automatically maintains a constant water level
- The unit should have dual float mechanism uses backup float for safety
- The patient wearing with circuit step-down option
- The expiratory limb mobile condensate is eliminated with the evaqua dual heated circuits.

- The heated humidifier system should include blender, humidifier, mountable on a mobile stand, adjustable I.V pole with two hooks, monitoring holder for humidifier, interface and circuits.
- The heated humidifier should be closed system
- The system should be suitable for all patients, and it should provide optimal humidity to all the ICU patients.
- Unit should have Clinically-based alarm system and select invasive or non invasive mode.
- Should work on centralized oxygen and Air. Should also work without Oxygen input.
- Pressure generator near the baby should be single use.
- Rates for disposable circuit shall be quoted and it shall be valid for 7 years.
- The Heated humidifier machine should be able to deliver and expiratory pressure of 0-10cm water with increment of 1cm of water.
- The unit should be provided with tubing and circuits.
- Unit should be supplied with all the standard accessories and one set of consumable along with the machine.
- Unit should deliver optimal humidity for invasive and non invasive patients,
- It should be designated for modern Bi-Level/CPAP ventilators requiring a low resistance to flow circuit.
- Supply voltage: 230V-, 115V-, 100
- Frequency:50/60 Hz
- Maximum power usage 210W
- Warm up time: < 30 minutes
- Flow range: Invasive (Continuous) 3-60l/min
- Non invasive (ventilator flow) 3-120L/min
- Chamber should be constant compressible volume
- Circuits should be latex free
- Accessories: Catheter mount, patient weaning kit
- The equipment should be European CE 93/42 or US FDA 510k certified.
- The Manufacturer should be ISO 9001 and ISO 13485 certified.
- Installation and training will be provided at end-user site.
- User manual with trouble shooting guidance, in English.
- Along with the system supplier should supply all the standard accessories, and 5 no.of disposable circuits and 1 no.of reusable circuit.

### **34. WARMER BLANKET (CONDUCTIVE WARMING DEVICE)**

- Warming equipment: Warmer blanket (Conductive warming devices)
- Warming equipment devices were primarily used in the operating room for warming the patient to prevent hypothermia, warming blankets that do not use forced-air and warming lamps.
- This device is mainly for pediatric intensive care unit patients. i.e for children.
- These device should work promptly to protect from hypothermia for the pediatric patients.
- It should be removed brand and make.
- The equipment should be European CE and US FDA certified.
- The Manufacturer should be ISO 9001 and ISO 13485 certified.
- Installation and training will be provided at end-user site.
- User manual with trouble shooting guidance, in English.
- Standard accessories should be supplied along with machine for smooth function. If required any consumable should be supplied with machine for initial 5-10 patients.

## TURNKEY WORK SCHEDULE

S.No	DESCRIPTION	QTY	UNIT
<b>ALUMINUM WORK</b>			
	For shutters of doors, windows & ventilators including providing and fixing hinges/ pivots and making provision for fixing of fittings wherever required including the cost of EPDM rubber / neoprene gasket required (Fittings shall be paid for separately) Powder coated aluminium (minimum thickness of powder coating 50 micron)		M.T
	Providing and fixing aluminium work for doors, windows, ventilators and partitions with extruded built up standard tubular sections/appropriate Z sections and other sections of approved make conforming to IS: 733 and IS: 1285, fixing with dash fasteners of required dia and size, including necessary filling up the gaps at junctions, i.e. at top, bottom and sides with required EPDM rubber/ neoprene gasket etc. Aluminium sections shall be smooth, rust free, straight, mitred and jointed mechanically wherever required including cleat angle, Aluminium snap beading for glazing / paneling, C.P. brass / stainless steel screws, all complete as per architectural drawings and the directions of Engineer-in-charge : Powder coated aluminium (minimum thickness of powder coating 50 micron)	0.3	MT
	S/F 100mm brass lock for aluminium door including necessary cutting and making good etc. complete	QRO	EACH
	Providing and fixing aluminium tower bolts (100*10mm) ISI marked anodised (anodic coating not less than grade AC 10 as per IS : 1868 ) transparent or dyed to required colour or shade with necessary screws etc. complete :	QRO	EACH
	Providing and fixing glazing in aluminum door, window, ventilator shutters and partitions etc. with EPDM rubber / neoprene gasket etc. complete as per the architectural drawings and the directions of Engineer-in- Charge. (Cost of aluminum snap beading shall be paid in basic item): With float glass panes of 8 mm thickness.	81	SQM
	Providing and fixing anodised aluminium grill (anodised transparent or dyed to required shade according to IS: 1868 with minimum anodic coating of grade AC 15) of approved design/pattern, with approved standard section and fixed to the existing window frame with C.P. brass/ stainless steel screws @ 200 mm centre to centre, including cutting the grill to proper opening size for fixing and operation of handles and fixing approved anodised aluminium standard section around the opening, all complete as per requirement and direction of Engineer-in-charge. (Only weight of grill to be measured for payment).	QRO	M.T
	Providing and fixing aluminum tubular handle bar 32 mm outer dia, 3.0 mm thick & 2100 mm long with SS screws etc. complete as per direction of Engineerin-Charge. Anodized (AC 15 ) aluminum tubular handle bar	QRO	EACH

S.No	DESCRIPTION	QTY	UNIT
	Providing and fixing aluminium hanging floor door stopper ISI marked anodised (anodic coating not less than grade AC 10 as per IS : 1868) transparent or dyed to required colour and shade with necessary screws etc. complete. With twin rubber stopper	QRO	EACH
	Providing and fixing double action hydraulic floor spring of approved brand and manufacture IS : 6315 marked, for doors including cost of cutting floors as required, embedding in floors and cover plates with brass pivot and single piece M.S. sheet outer box with slide plate etc. complete as per the direction of Engineer-in-charge. With Brass cover Plate	QRO	EACH
	Filling the gap in between aluminium/ stone/wood frame and adjacent RCC/ Brick/ Stone/ wood/ Ceramic/ Gypsum work by providing weather/structural non sag elastomeric PU sealant over backer rod of approved quality as per architectural drawings and direction of Engineer- in-charge complete, complying to ASTM C920, DIN 18540-F & ISO 11600. Upto 20 mm depth and 20 mm width	64	RM
	Providing and fixing 12 mm thick pre laminated particle board flat pressed three layer or graded wood particle board conforming to IS: 12823 Grade I Type II, in paneling fixed in aluminum doors, windows shutters and partition frames with C.P. brass / stainless steel screws etc. complete as per architectural drawings and directions of Engineer-inCharge. Pre-laminated particle board with decorative lamination on both sides	12	SQM
<b>FLOORING</b>			
	Providing & laying first class full body vitrified ceramic tile of make Kajaria/ Restile/Johnson or equivalent of size 600mmx600mmx 9.5mm or approved size of approved colour (matt finish) in flooring using spacer of required size (2mm-4mm) from endura or equivalent over a bed of cement mortar 1:4 of required thickness to match finished floor level mentioned and to match the neighbouring floor finish and jointed with epoxy grout of approved shade from Bal Endura or equivalent brand all complete as directed.(Basic cost of tile - Rs.85/sft).Any difference in basic price and OHP at the time of approval shall be adjusted for the laid area.No extra shall be payable for forming any pattern in the flooring like border, cut tiles,etc.	12	M.SQ
	Providing and laying 600mm x 600mm or required size from Kajaria/ Restile/Johnson glazed tiles of plain series(Satin finish) in dado set in CM 1:3 with joints so as to form a true & even surface and joints finished neatly with white cement mixed with matching pigments all complete as directed. (Rate should include base plastering with CM 1:5 of required thickness.)	358	M.SQ
	The rate shall include cost of providing 6mmx6mm groove in the plastering at top of the tile all complete as directed.(Basic cost of tile - Rs.85/sft).Any difference in basic price and OHP at the time of approval shall be adjusted for the laid area.No extra shall be payable for forming any pattern like border, etc.		

S.No	DESCRIPTION	QTY	UNIT
	Providing and fixing 40 mm thick gang saw cut, mirror polished, premoulded and prepolished, machine cut for kitchen platforms, vanity counters, window sills, facias and similar locations of required size, approved shade, colour and texture laid over 20 mm thick base cement mortar 1:4 (1 cement : 4 coarse sand), joints treated with white cement, mixed with matching pigment, epoxy touch ups, including rubbing, curing, moulding and polishing to edges to give high gloss finish etc. complete at all levels. Granite of any colour and shade. Area of slab over 0.50 sqm	3	M.SQ
<b>MASONRY WORK</b>			
	Half brickwork with locally available best quality table moulded bricks of not less than 50kg/sq.cm crushing strength in CM 1:3 (1 cement 3 sand ) and reinforced with two numbers of 6mm dia. M.S rods at every fourth course embedded in cement mortar 1:4 for partitions.	6	M.SQ
	In Ground Floor		
<b>PLASTERING</b>			
	Prepare surfaces and plaster with CM 1:5(1cement, 5 sand) ,12mm minimum thick to all interior faces of walls (sponge finish) including RCC surfaces not contiguous to masonry.Necessary internal grooves of size 10mmx10mm shall be carried out as shown/directed by engineer-in-charge.	18	M.SQ
<b>PAINTING</b>			
	Prepare surfaces and paint two coats of plastic emulsion paint of approved colour over two coats of Gypsum punning of 6 mm minimum thick and primer all complete as per manufacturers specifications to all ceilings in all floors	QRO	M.SQ
	Finishing with oil bound washable Interior Emulsion of approved brand and manufacture to give an even shade : New work (two or more coats) over and including water thinnable priming coat with cement primer	87	M.SQ
	Painting wood work with Deluxe Multi Surface Paint of required shade. Two or more coat applied @ 0.90 ltr/10 sqm over an under coat of primer applied @0.75 ltr/10 sqm of approved brand and manufacture	QRO	M.SQ
	Painting Steel work with Deluxe Multi Surface Paint to give an even shade. Two or more coat applied @ 0.90 ltr/ 10 sqm over an under coat of primer applied @ 0.80 ltr/ 10 sqm of approved brand and MANUFACTURE	QRO	M.SQ
	Providing and applying plaster of paris putty of 2 mm thickness over plastered the surface even and smooth complete.surface to prepare	87	M.SQ
	Removing white or colour wash by scrapping and sand papering and preparing the surface smooth including necessary repairs to scratches etc. complete	87	M.SQ
	Finishing with Deluxe Multi surface paint system for exteriors using Primer as per manufacturers specifications : Two or more coats applied on walls @ 1.25 ltr/10 sqm	QRO	M.SQ
<b>DISMANTLING</b>			

S.No	DESCRIPTION	QTY	UNIT
	Dismantling plastered brickwalls in cement mortar including cleaning, stacking the useful materials as directed by engineer-in-charge and dumping the dismantled debris as indicated at site, levelling, consolidating, all complete as directed and disposing the debris away from site all complete as directed.	1	M.CUBE
	Dismantling Aluminium partition including disposing the debris away from site as directed by engineer in charge all complete.	6	M.SQ
<b>PLUMBING</b>			
	Providing and fixing wash basin with C.I. brackets, 15 mm C.P. brass pillar taps, 32 mm C.P. brass waste of standard pattern, including painting of fittings and brackets, cutting and making good the walls wherever require: White Vitreous China Wash basin size 630x450 mm with a pair of 15 mm C.P. brass pillar taps	3	EACH
	Providing and fixing Chlorinated Polyvinyl Chloride (CPVC) pipes, having thermal stability for hot & cold water supply including all CPVC plain & brass threaded fittings i/c fixing the pipe with clamps at 1.00 m spacing. This includes jointing of pipes & fittings with one step CPVC solvent cement and the cost of cutting chases and making good the same including testing of joints complete as per direction of Engineer in Charge. Concealed work including cutting chases and making good the walls etc		
	20 mm nominal outer dia .Pipes	98	RM
	32 mm nominal outer dia Pipes	98	RM
	50 mm nominal outer dia Pipes	QRO	RM
	Providing and fixing PVC Waste pipe for sink or wash basin including PVC waste fittings complete.: Semi rigid pipe 32mm dia	2	EACH
	Providing and fixing CP Waste coupling for wash basin and sink of approved quality, colour and make. Waste coupling 31mm of 79mm length and 62mm breadth, weighing not less than 45 gms. Make: Hindware, Jaquar etc.,	2	EACH
	Extra for providing opening of required size & shape for wash basin/ kitchen sink in kitchen platform, vanity counter and similar location in marble/ Granite/stone work, including necessary holes for pillar taps etc. including moulding, rubbing and polishing of cut edges etc. complete.	1	EACH
	Providing and fixing 600x450 mm beveled edge mirror of superior glass (of approved quality) complete with 6 mm thick hard board ground fixed to wooden cleats with C.P. brass screws and washers complete.	1	EACH
	Providing and fixing PTMT towel rail complete with brackets fixed to wooden cleats with CP brass screws with concealed fitting arrangement of approved quality and colour. 600mm long towel rail with total length of 645mm, width 78mm and effective height of 88mm, weighing not less than 190 gms	2	EACH
	Providing and fixing PTMT liquid soap container 109mm wide, 125mm high and 112mm distance from wall of standard shape with bracket of the same materials with snap fittings of approved quality and colour. weighing not less than 105 gms.	2	EACH

S.No	DESCRIPTION	QTY	UNIT
<b>CURTAIN WORK</b>			
	1.Two range of curtain cloth – Type 1 - II.		
	2. Both for doors, windows and partions.		
	3. Assorted colours plain & prints		
	4.Stitched as per site/ size requirement		
	5.Minor modifications in stitching as per site/ size requirement		
	6.Preferred colour (Brown, Cream, Beige)		
	7.Curtain price (including cloth & curtain rod) to be quoted in Squire metre		
	8.Stitching for each curtain to be absorb in the price of the cloth generally 2 meters.		
	9.Fast colours, water wash		
	10.Fabric density Non Transparent Composition		
	11.Fabric of curtain shall be soft texture, great shading, drape effect and nice doobby.		
	12.The bracket shall be side mounted and front mounted as required		
	13.First rod mount is 3.5 inches from the wall.		
	14.Where curtain used as a partition/ long length, sufficient support from ceiling should be provided to avoid sagging.		
	15.Rate quoted for fully stitched Curtain with top nepha with punch holes after lining bucramreinforced with SS / PVC islets and lower nepha 200mm double turned.		
	Type -I (Surgical Curtain) Curtain fabric weight shall be up to 275-300 (±5%) gsm Composition of fabric shall be polyester yarn I.E. 300 denier fast colour sink age shall be (±5%) Weft and warp shall be polyester / cotton polyester mix	QRO	M.SQ
	Type - II (Window & Door Curtain) Curtain fabric weight shall be up to 250-275 (±5%) gsm Composition of fabric shall be polyester yarn I.E. 300 denier fast colour sink age shall be (±5%) Weft and warp shall be polyester / cotton polyester mix	QRO	M.SQ
	Providing and fixing of vertical/roller blinds width 100 mm regular quantity made from 100 % polyster/Fibre yarn coated with fade resistant polymer to ensure complete opaquety with zero light transmittance, having suitable coating on exterior, including all fixtures and fittings complete in all respect as per design and instruction of Engineer in-charge and as per site conditions. The colour will be approved by the competent authority Make-MAC/VISTA/NOVA or any equivalent make.	117	M.SQ
	Providing and fixing of Single Tap Scrub Station as per the specification as follows	5	Each
	1.Deep sloping basin		
	2. One High mount spout/taps with elbow operated flow regulator (length of flow regulator approximately 18-24cms)		
	3. Tap should have provision for manual aeration of water		

S.No	DESCRIPTION	QTY	UNIT
	4. 304 stainless steel polished and ground		
	5. Wall Mounted Design with provision for back panel wall bracket fixation		
	6. Provision for Scrub Solution Stand with long handle for pumping		
	7. Sizes		
	a. Width – Approximately 90-100 cms		
	b. Height of Back Panel of sink – 90 -95 cms		
	c. Height of Sink from Ground – 100-110 cms		
	d. Depth of Sink from Top of the Sink – 40-45 cms		
	e. Height of Tap from the top of the sink – 25-28 cms		
	f. Protrusion of Sink from Wall – 45-50 cms		
	Providing and fixing of Two Tap Scrub Station as per the specification as follows	3	Each
	1. Deep sloping basin		
	2. Two High mount spout/taps with elbow operated flow regulator (length of flow regulator approximately 18-24cms)		
	3. Tap should have provision for manual aeration of water		
	4. 304 stainless steel polished and ground		
	5. Wall Mounted Design with provision for back panel wall bracket fixation		
	6. Provision for Scrub Solution Stand with long handle for pumping		
	7. Sizes		
	a. Width – Approximately 130-140 cms		
	b. Height of Back Panel of sink – 90 -95 cms		
	c. Height of Sink from Ground – 100-110 cms		
	d. Depth of Sink from Top of the Sink – 40-45 cms		
	e. Height of Tap from the top of the sink – 25-28 cms		
	f. Gap Between two taps – 65- 68 cms		
	g. Protrusion of Sink from Wall – 45-50 cms		
<b>SIGNAGES &amp; FURNITURES</b>			
	Supply and fixing bilingual signage (Hindi & English) or only English. The signage letters will be made with premium quality vinyl sheet of approved colour, pasted on 3mm thick acrylic sheet and 1” studs complete. The floor plans will be fixed on the wall with the help of screws and double tape etc. to give neat & finished look.	18	EACH
	21”X 4” (84 Sq. inch )		

S.No	DESCRIPTION	QTY	UNIT
	Providing and fixing LED (1.2 watt each of reputed make such as M/s Samsung or equivalent,) signage of NIB on flat roof top as per the given sketch including designing & fabrication of mild steel structure for holding the signage. The letter will be made in approved colour with acrylic sheet and waterproof LEDs and outdoor type transformers will be used in the signage. The mild steel structure will be anchored with the brickwork by using anchor bolts etc. so as to withstand high pressure wind/ storm, complete work including s/o a M.S. ladder from lower roof top to signage site roof top for working & future maintenance, s/o all T&P etc. required for proper completion of the work. The design of structural steel will be got checked and signed by a structural engineer before execution of the work.	2	SQM
	Providing & Fixing mid back chair .The seat & back are made up of 12mm thick hotpressed plywood, upholstered with fabric & moulded with Polyurethane foam seat and back covers. The back foam should designed with contoured lumbar support for extra comfort .The seat has extra thick foam on front edge to give extra comfort.Mid back size 475 mm Width x 580 mm Height mm. And seat size 470 mm Width x 480 mm The polyurethane foam should be moulded with density = 45 kg/m <sup>3</sup> and hardness = 16 +/- 2 kg on hampdem machine at 25% compression .Armrest are injection moulded from black copolymer polypropylene. The mechanism should be fixed 360 degree revolving type,Upright position locking, tilt tension adjustment, seat back tilting ratio 1:3. The pneumatic height adjustment has an adjustment stroke of 12 cm. The pedestal should be injection moulded in black 33 % glass filled in nylon 66 with 5 nos twin wheel castors. The pedestal should be 66.3 cm pitch- center diameter.	12	EACH
	Supplying and fixing of Three Seater Waiting Area Visitor Chairs · Non-Magnetic SS perforated sheet seat and back shell made of high quality steel makes it strong and durable. · 1608mm (L)X 695 (H) X 555 (D). Legs and Armrests are made of cold rolled steel and are chrome plated for long life. Armrest and legs are anti rust and anti scratch.	2	EACH
	Providing and Supplying table of size 1350W x 750 D x 750H, whose work surface is made of 18mm thick. Pre Laminated Particle Board (PLB) All work surface edges are duly sealed with 2mm thick PVC Edge banding. The modesty panel is made of 18mm thick. Pre Laminated Particle Board (PLB) All work surface edges are duly sealed with 2mm thick PVC Edge banding. The rectangular frame is fabricated component in 1.2mm thick CRCA (IS:513), Finish: Powder coated (Epoxy polyester). The leg is Fabricated component in 38mm x25mm x1.2mm thick MS ERW Tube (IS:7138), Finish: Powder coat (Epoxy polyester).The leveler glide for leg is Nylon 6 & MS Bolt. The shell and drawer tray are made of 0.6mm thick CRCA (IS:513), Finish: Powder coat (Epoxy polyester).The drawer front is 0.8mm thick CRCA (IS:513), Finish: Powder coat (Epoxy polyester) and frame assembly is 1.2mm thick CRCA (IS:513), Finish: Powder coat (Epoxy polyester).	6	EACH

S.No	DESCRIPTION	QTY	UNIT
	Providing and Supplying shoe rack of size 1175W x 1175 H x 375 D, whose work surface is 25mm thick. Pre Laminated Particle Board (PLB) OR Engineered Wood All work surface edges are duly sealed with 2mm thick PVC Edge banding. The modesty panel is made of 18mm thick. Pre Laminated Particle Board (PLB) All work surface edges are duly sealed with 2mm thick PVC Edge banding. Powder coat (Epoxy polyester). Brand: Evok OR Equivelent Assembly: Carpenter Assembly Dimensions: 1175W x 1175 H x 375 D Primary Material: Engineered Wood Room Type: Living Room	1	<b><i>EACH</i></b>
	Providing & Fixing Sofa-2 seater. Size: 1320 mm (W) x 835 mm (D) x 690 mm (H) Seat Height from ground 415 mm. Frame is made up of Tropical Solid Wood with synthetic leather Upholstery, Seat Foam : Polyurethane Foam with recron layer. Foam Density : 18 kg/ cubic cm. Back Foam : Polyurethane Foam with silicon fill at arms. Foam Density : 22 kg/cubic cm S-Spring webbing. The Sofa is based on wooden legs	QRO	<b><i>EACH</i></b>
	Providing & Fixing HIGH back executive chair .The seat & back are made up of 12mm thick hotpressed plywood, upholstered with fabric & moulded with Polyurethane foam seat and back covers. The back foam should be designed with contoured lumbar support for extra comfort .The seat has extra thick foam on front edge to give extra comfort. Mid back size 475 mm Width x 580 mm Height mm. And seat size 470 mm Width x 480 mm The polyurethane foam should be moulded with density = 45 kg/m <sup>3</sup> and hardness = 16 +/- 2 kg on Hampden machine at 25% compression .Armrest are injection moulded from black copolymer polypropylene. The mechanism should be fixed 360 degree revolving type, Upright position locking, tilt tension adjustment, seat back tilting ratio 1:3. The pneumatic height adjustment has an adjustment stroke of 12 cm. The pedestal should be injection moulded in black 33 % glass filled in nylon 66 with 5 nos twin wheel castors. The pedestal should be 66.3 cm pitch- center diameter	3	<b><i>EACH</i></b>
	Providing and supplying and fixing wooden cupboard with drawers (12no.) Specifications: 19mm commercial ply with ISI brand, neem core, inside and outside laminate finish with heavy duty telescopic drawer channel. Load for each drawer channel will be 50Kg Size: 2400mm length/600mm depth /900mm height	2	<b><i>EACH</i></b>
	Providing and supplying and fixing wooden cupboard with drawers (8no.) Specifications: 19mm commercial ply with ISI brand, neem core, inside and outside laminate finish with heavy duty telescopic drawer channel. Load for each drawer channel will be 50Kg Size: 1800mm length/600mm depth /1800mm height	8	<b><i>EACH</i></b>
	Supply of the FEATHERLITE Versaline Executive Table as per the Featherlite specifications . 1.V-MT 1890, W 1800 x D 900 x H 750 2. V-ST 1245 (LH & RH), W 1200 x D 450 x H 750 and 3. V-CZ, W 1200 x D 450 x H 750	2	<b><i>EACH</i></b>
<b>ANTI-STATIC FLOORING &amp; COVING</b>			

S.No	DESCRIPTION	QTY	UNIT
	Supply installation testing & commissioning (SITC) of PVC coving D 50 with required aluminium / PVC back supports with application of clear sealant to the lips of the coving, complete with all necessary hardware, accessories, fittings and fixtures, as per description in individual items, technical specifications, drawings and instructions of the Engineer-Incharge	146	RM
	PVC 3D corner covings with back supports as required and application of clear sealants to all joints, complete with all necessary hardware, accessories, fittings and fixtures, as per description in individual items, technical specifications, drawings and instructions of the Engineer-Incharge.	98	Nos.
	Providing and laying 13 mm thick antistatic/conductive vinyl flooring of make Marvel Vinyl/ Electra plus or equivalent of approved quality and colour conforming to the IS: 3462/ 1986 on the finished concrete or terrazzo tiles flooring or any hard surface with necessary approved adhesive for laying antistatic vinyl sheet/roll including cleaning the floor before and after laying of vinyl flooring and providing thin copper strip of size about 20.00 x 0.20 mm along the periphery of room and below each joint of two sheets wherever directed with copper screws/ rivets @600 mm c/c .Two ends of copper strips (terminals) to be fixed to wall about 300 mm height for earthing of antistatic flooring all complete as per the direction of Engineer-in- charge.( NOTE any deduction beyond 0.5 Sqm will be deducted from the measurement)	270	M.SQ
<b>FALSE CEILING &amp; CLADDING</b>			
	Installation and Commissioning of Automatic Door Providing and fixing of ES 200 Easy 6.25mtr Automatic Sliding system for 12 mm glass. Clear opening:- 2600 mm X 2600 mm, Double Leaf Door. Glass Door Panel weight should not Exceed 150Kg. Leaf Door ES200 Easy 6.25 mtr. Automatic Sliding. operator consist of :- Operator profile, Mechanical Components, Electrical. Components, 1200mm Glass Clamping Rail - 2 nos, 2 no's Floor Guide, Program Switch with cable, 1set Light Barrier, Eagle 6 Radar 2 no's, Installation of Moving Panels, S.S Fixture for Light Barrier, U- Channel For fix glass 1 Nos.	2	each
	Supplying of automatic motorized single leaf sliding door with glass portion made from 12mm frameless toughened glass consisting of all fitting accessories and automation system comprising of single leaf sliding door actuator with built in photocells. Clear opening:- 1200 mm X 2100 mm, A pair of microwave radar and accessories i.e. Electromechanical lock with manual release device. Digital programmer switch, Back up battery, DMCS Software, Central rabbet seal for sliding glass panels all complete including GST, Freight etc. as per instruction of Engineer Incharge and Installation of Automatic motorized double leaf sliding door made of 10 mm thick frame less toughened glass consisting of all fitting accessories (Labour charges)	5	Each

S.No	DESCRIPTION	QTY	UNIT
	Removing and fixing in position of Existing false ceiling in armstrong 600 x 600 x 15/16 mm Dune Supreme RH 99 Prima tile with SILLHOUT Groove type FINE FISSURED RIGHT ANGLE EDGE TILES WITH ARMSTRONG SELECT (WHITE) 15 MM EXPOSED GRID frame work with microlok as specified by Armstrong Co. with suspenders wherever required. Making necessary framework for A.C. ducting, if any and necessary cutouts for diffusers and light fittings, taping and finishing to proper line & level, including making grooves and trap doors for A.C. unit in 18 mm thick M.R. Grade Plywood with Stainless steel hinges & locks with moulding 1" x 1" for edges including finishing with White PlasticEmulsion Paint etc. complete in all respects. (Note:- Only the plan area will be measured for payment. No extra payment will be ,made for cutouts, grooves, mouldings etc.).	288	<i>M.SQ</i>
	MODULAR CEILING PANELS - 50MM thick & Aluminium Ceiling Grid		
	Supply installation testing & commissioning (SITC) of the Modular False Ceiling System shall comprise of ceiling panels of double skin type 50mm thick, sandwiched with selfextinguishing quality PUF of density not less than 38kg / cum the inner and outer skin shall be of powder coated steel sheet, the thickness of inner skin and outer skin of the panel shall not less than 0.8mm the powder coated steel sheet shall be hot dip galvanized with zinc coating not less than 180gm/sqm both side of the GI sheet used. The false ceiling system shall also include ceiling grid system consisting of T-grid of extruded aluminum anodized surface, wall angle, suspender rod, turnbuckle, nuts, bolts, anchor fasteners etc., as required for fixing the panels, & HEPA filter frame, ceiling grid configuration length and width shall be suitable for fixing ceiling blanks, HEPA module, light fixtures etc. All the suspended material shall be galvanized finish. The ceiling grid system shall be suitable for walkable type false ceiling.the vertical panels to be from false ceiling till the true concrete ceiling. Fire rating - class O and colored approved by HLL. IMPORTANT NOTE: The contractor to take utmost care for tranport,shifting and erecting complete with all necessary hardware, accessories, fittings and fixtures, as per description in individual items, technical specifications, drawings and instructions of the Engineer-Incharge.Note:Necessary cutopens to be made for service outlets and finished after passing the service outlets.	270	MSQ

Sl.No	DESCRIPTION	UNIT	QTY
1	<b>Point wiring in PVC conduit with modular type switch.</b>		
	Wiring for light point/fan point/exhaust fan point /call bell point with 1.5 sq mm FR PVC insulated copper conductor single core cable in surface/recessed medium class PVC conduit, with modular switch, modular plate, suitable PVC box and earthing the point with 1.5 sq.mm FR PVC insulated copper conductor single core cable etc as required.		
	Group C	Point	60
2	<b>Wiring through PVC conduit</b>		
	Wiring for circuit/submain wiring along with earth wire with the following sizes of FR PVC insulated copper conductor, single core cable in surface/recessed medium class PVC conduit as required.		
a	2X1.5 sq.mm + 1X1.5 sq.mm earth wire	Metre	610
b	2X2.5 sq.mm + 1 X2.5 sq mm earth wire	Metre	2170
c	2X4 sq.mm + 1X4 sq.mm earth wire	Metre	2354
3	<b>A/C point</b>		
	<b>S/F 20A SPN MCB industrial socket outlet:</b> Supplying and fixing 20 amps, 240 volts, SPN industrial type, socket outlet, with 2 pole and earth, metal enclosed plug top alongwith 20 amps "C" curve, SP, MCB, in sheet steel enclosure, on surface or in recess, with chained metal cover for the socket out let and complete with connections, testing and commissioning etc. as required.	Point	0
4	<b>Modular type blanking plate:</b>		
	Supplying and fixing modular blanking plate on the existing modular plate & switch box excluding modular plate as required.	Each	25
5	<b>Modular boxes, bases &amp; cover plate:</b>		
	Supplying and fixing following size/modules, PVC box along with modular base & cover plate for modular switches in recess etc as required.		
a	2 module	Each	5
b	3 module	Each	53
c	6 module	Each	95
d	8 module	Each	2
6	<b>Modular type switch/socket:</b>		
	Supplying and fixing following modular switch/socket on the existing modular plate & switch box including connections but excluding modular plate etc as required.		

Sl.No	DESCRIPTION	UNIT	QTY
a	5/6 Amps switch	Each	237
b	3 pin 5/6 Amp socket outlet	Each	237
c	15/16 Amps switch	Each	20
d	6pin 15/16 Amps (universal) socket outlet	Each	20
e	Telephone socket outlet	Each	6
7	<b>Telephone wiring in existing conduit:</b>		
	Supplying and drawing following pair 0.5 sq mm FR PVC insulated annealed copper conductor, unarmored telephone cable in the existing surface/ recessed steel/ PVC conduit as required.		
a	2 Pair	Metre	190
8	<b>S/F PVC conduit:</b>		
	Supplying and fixing of following sizes of medium class PVC conduit along with accessories in surface/recess including cutting the wall and making good the same in case of recessed conduit as required.		
a	20 mm	Metre	195
b	32 mm	Metre	190
9	<b>ITC Fluorescent fitting directly on surface:</b> Installation, testing and commissioning of pre-wired, fluorescent fitting / compact fluorescent fitting of all types, complete with all accessories and tube etc. directly on ceiling/ wall, including connection with 1.5 sq. mm FR PVC insulated, copper conductor, single core cable and earthing etc. as required.	Each	26
9.1	<b>ITC Ceiling fan:</b> Installation, testing and commissioning of ceiling fan, including wiring the down rods of standard length (upto 30 cm) with 1.5 sq. mm FR PVC insulated, copper conductor, single core cable etc. as required.	Each	0
10	<b>CABLE LAYING</b>		
	Laying and fixing of one number PVC insulated and PVC sheathed / XLPE power cable of 1.1kV grade of following size clamped on wall surface with 1mm thick saddles as required complete.		
a	<b>From VDB to LDB</b>		
	4X16 sq.mm	Metre	25
b	<b>From VDB to PDB</b>		
	4X25 sq.mm	Metre	70
c	<b>From DG to VDB</b>		
	3.5X50 sq.mm	Metre	75

Sl.No	DESCRIPTION	UNIT	QTY
11	<b>END TERMINATION</b>		
	Supply and making end termination with brass compression gland, earth clip and aluminium lugs for following size of PVC insulated and PVC sheathed/XLPE aluminium conductor cable fo 1.1KV grade as required.		
a	4X16 sq.mm	Each	2
b	4X25 sq.mm	Each	10
c	3.5X50 sq.mm	Each	6
12	Supply and installation of 20W recess mounted, decorative Soft lite luminaire, powder coated CRCA housing complete with all electrical accessories like electronic ballast, lamp holder, 20W LED etc complete with all mounting accessories like chain, anchor fastner etc as required. <b>(Make Crompton,Havells)</b>	Each	28
13	Supplying and fixing PVC angle batten/batten holder with 12W LED, including connection as required.	Each	3
14	Supply of 1x28W flourescent tube fitting sleek with decorative end cap, powder coated CRCA steel channel complete with all electrical accessories like electronic ballast, lamp holder, 28W T5 lamp etc complete as required. <b>(Philips TMS 540 HF / Wipro WRF 80128 SG / GE DMS 28 N N)</b>	Each	3
15	Supply & installation of 1x9 watts recess mounted down light fixture, with aluminium reflector, CRCA sheet housing, complete with all accessories like ballast, 9W LED lamp etc complete as required.	Each	26
16	Supply and installation of Ceiling fan with its all accessories(Make Havells/bajaj/usha)	Each	0
17	<b>S/F Enclosure for UPS</b>		
	Supplying and fixing following way, three pole and neutral, sheet steel, Enclosure 415 volts, on surface/recess.	Each	2
	100A/25KV MCCB	Each	2
17	<b>S/F Vertical Type TP MCB DB:</b>		
	Supplying and fixing following way, three pole and neutral, sheet steel, Vertical MCB distribution board, 415 volts, on surface/recess, complete with tinned copper busbar, neutral busbar, earth bar, din bar, detachable gland plate, interconnections, phosphatised and powder painted including earthing etc. as required (with provision for isolator as incomer) <b>(Make: Legrand/Havells/HPL)</b>		
	4 way, double door	Each	2.00

Sl.No	DESCRIPTION	UNIT	QTY
17.1	<b>S/F of FP Isolators</b>		
	Supplying and fixing following rating, four pole, (three phase and neutral) 415 volts isolators in the existing Vertical DB as incomer complete with connections, testing and commissioning etc as required.( <b>Make: Legrand/Havells/HPL</b> )		
	63/100 A, 4P isolator	Each	2.00
17.2	<b>S/F of TP MCB</b>		
	Supplying and fixing 6 amps to 63 amps rating, 415 Volts, "C" series, miniature circuit breaker suitable for lighting and other loads of following poles in the existing MCB DB complete with connections, testing and commissioning etc as required.( <b>Make: Legrand/Havells/HPL</b> )		
	32A TP MCB	Each	2.00
	63A TP MCB	Each	5.00
18	<b>S/F of TPN MCB PDB</b>		
	Supplying and fixing following way, three pole and neutral, sheet steel, MCB distribution board, 415 volts, on surface/recess, complete with tinned copper bus bar, neutral busbar, earth bar, din bar, detachable gland plate, interconnections, phosphatised and powder painted including earthing etc. as required (But without MCB/ RCBO/isolator) ( <b>Make: Legrand/Havells/HPL</b> )		
	12 way Double door, horizontal type.	Each	2.00
18.1	<b>S/F of TPN RCBO</b>		
	Supplying and fixing following rating, four pole, (three phase and neutral) 415 volts RCBO, having a sensitivity current upto 100/300 milliamperes in the existing MCB PDB complete with connections, testing and commissioning etc. as required.( <b>Make: Legrand/Havells/HPL</b> )		
	63 A 4P RCBO 100mA	Each	2.00
18.2	<b>S/F of SP MCB</b>		
	Supplying and fixing 6 amps to 32 amps rating, 240 Volts, "C" series, miniature circuit breaker suitable for power loads of following poles in the existing MCB DB complete with connections, testing and commissioning etc as required.( <b>Make: Legrand/Havells/HPL</b> )		
	15A SP MCB	Each	115.00
19	<b>TPN MCB LDB AND PDB</b>		
	Supplying and fixing following way, three pole and neutral, sheet steel, MCB distribution board, 415 volts, on surface/recess, complete with tinned copper bus bar, neutral busbar, earth bar, din bar, detachable gland plate, interconnections, phosphatised and powder painted including earthing etc as required(But without		

Sl.No	DESCRIPTION	UNIT	QTY
	MCB/RCBO /isolator) (Make:Legrand/Havells/ HPL)		
	8 way (4+12), double door	Each	4.00
19.1	<b>S/F of TPN RCBO</b>		
	Supplying and fixing following rating, four pole, (three phase and neutral) 415 volts RCBO, having a sensitivity current upto 30 milliamperes in the existing MCB LDB complete with connections, testing and commissioning etc. as required.(Make: Legrand/Havells/HPL)		
	32/40 A 4P RCBO 30mA	Each	4.00
19.2	<b>S/F of SP MCB</b>		
	Supplying and fixing 6 amps to 10 amps rating, 240 Volts, "C" series, miniature circuit breaker suitable for lighting and other loads of following poles in the existing MCB DB complete with connections, testing and commissioning etc as required.(Make: Legrand/Havells/HPL)		
	6/10A SP MCB	Each	20
20	<b>CABLE SUPPLY</b>		
	Supplying the following PVC insulated and PVC sheathed/XLPE power COPPER cable of 1.1 KV grade as per CPWD standards as required. (Make:Havells/ Glostar/Nicco)		
A	4X10 sq.mm	Metre	25
B	3.5X25 sq.mm	Metre	70
C	3.5X50 sq.mm	Metre	75
21	Pipe earthing with G.I. earth pipe 2.5 metre, long, 40 mm dia including accessories, and providing masonry enclosure with cover plate having locking arrangement and watering pipe etc. with charcoal/ coke and salt ) as required complete.	Set	2
22	Supplying and laying 6 SWG Copper wire on, surface or in recess for loop earthing along with existing surface/recessed conduit/submain wiring/ cable as required.	Metre	50
23	Supplying and laying 10 SWG Copper wire on, surface or in recess for loop earthing along with existing surface/recessed conduit/submain wiring/ cable as required.	Metre	160
24	<b>WORK COMPLETION</b>		

Sl.No	DESCRIPTION	UNIT	QTY
24.1	Leading, Positioning, Installation, testing and commissioning of 20-25 kVA DG set with all its accessories	LS	0
24.2	TESTING CT & ENERGY METER	LS	0
24.2	Preparation of all drawings submitting and getting approval from Electrical Inspectorate, submitting of Completion certificates and arranging inspection, getting sanction and energisation certificates from Electrical Inspectorate & OEB, obtaining power allocation & power connection etc. for commissioning of the whole installation in the premises. all statutory payments will be reimbursed on production of the original receipts. (Finding the exact Feeder to tap power is under the scope of Contractor)	LS	0
25	<b>Miscellaneous Items</b>		
25.1	Miscellaneous electrical work, removing of existing conduits and interconnections of light, 6A socket/16A socket/A/C point from existing DB	LS	0
26	Supply and pointing exhaust fan shutter type white colour- 9"/10"(Make Havells/Bajaj/Almonard)	Each	0
27	Supply and Fixing of Calling bell with its all accessories	Each	3

**Section – VII**  
**Quality Control Requirements**

(Proforma for equipment and quality control employed by the manufacturer(s))

Tender Reference No.

Date of opening

Time

Name and address of the Tenderer:

Note: All the following details shall relate to the manufacturer(s) for the goods quoted for.

- 01 Name of the manufacturer
  - a. Full postal address with e mail address.
  - b. Telephone number
  - c. Fax number
  - d. E-mail
  
- 02 Quality control arrangement details
  - a. For final product evaluation
  
- 03 Test certificate held
  - a . Type test
  - b . BIS/ISO certification
  - c . Any other

**Signature and seal of the Tenderer**

**Section – VIII**  
**Qualification Criteria**

Sl. No.	Minimum Eligibility Criteria	Narrations
1	Authority to tender	The Tenderer must be a Manufacturer or Authorized Agent/dealer/Distributor or Consortium partner.
2	Entirety	The tenderer shall quote for all items in the list of requirements, if any of the item not quoted then their bid will be treated as non responsive.
3	Experience	<i>The tenderer shall have successfully established atleast 1 PICU facility on turnkey basis during last three years prior the date of Tender opening with similar equipment performing similar functions and meeting major specification parameters of the quoted item, which is functioning satisfactorily in India.</i>
4	Financial capability	The annual sales turnover for the bidder should be minimum of Rs. 3 Crore in any of the last 3 financial years:  During the year (2015-2016 to 2017-2018), and it should be certified by the chartered accountants. by Chartered Accountant shall be enclosed– Proforma ‘A’- I
5	Responsiveness to List of Equipments	The items quoted shall be responsive to the requirements in the List of Equipments in the Tender.

**Note**

1. In support of 3, the Tenderer shall furnish Performance statement in the enclosed Proforma ‘A’ II (SECTION- IX) duly signed by the Purchaser
2. The Tenderer shall furnish a brief write-up, packed with adequate data explaining and establishing his available capacity/capability (both technical and financial) to perform the Contract (if awarded) within the stipulated time period, after meeting all its current/present commitments. The Tenderer shall also furnish details of Equipment and Quality Control in the enclosed Section VII.
3. Notwithstanding anything stated above, the Purchaser reserves the right to assess the Tenderer’s capability and capacity to perform the contract satisfactorily before deciding on award of Contract, should circumstances warrant such an assessment in the overall interest of the Purchaser.
4. The Purchaser reserves the right to ask for a free demonstration of the quoted equipment at a pre determined place acceptable to the purchaser for technical acceptability as per the tender specifications, before the opening of the Price Tender.

## SECTION – X PRICE SCHEDULE (A)

### A-1) PRICE SCHEDULE FOR TURNKEY WORKS

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
<b>ALUMINUM WORK</b>					
	For shutters of doors, windows & ventilators including providing and fixing hinges/ pivots and making provision for fixing of fittings wherever required including the cost of EPDM rubber / neoprene gasket required (Fittings shall be paid for separately) Powder coated aluminium (minimum thickness of powder coating 50 micron)		M.T		
	Providing and fixing aluminium work for doors, windows, ventilators and partitions with extruded built up standard tubular sections/appropriate Z sections and other sections of approved make conforming to IS: 733 and IS: 1285, fixing with dash fasteners of required dia and size, including necessary filling up the gaps at junctions, i.e. at top, bottom and sides with required EPDM rubber/ neoprene gasket etc. Aluminium sections shall be smooth, rust free, straight, mitred and jointed mechanically wherever required including cleat angle, Aluminium snap beading for glazing / paneling, C.P. brass / stainless steel screws, all complete as per architectural drawings and the directions of Engineer-in-charge : Powder coated aluminium (minimum thickness of powder coating 50 micron)	0.3	MT		
	S/F 100mm brass lock for aluminium door including necessary cutting and making good etc. complete	QRO	EACH		
	Providing and fixing aluminium tower bolts (100*10mm) ISI marked anodised (anodic coating not less than grade AC 10 as per IS : 1868 ) transparent or dyed to required colour or shade with necessary screws etc. complete :	QRO	EACH		
	Providing and fixing glazing in aluminum door, window, ventilator shutters and partitions etc. with EPDM rubber / neoprene gasket etc. complete as per the architectural drawings and the directions of Engineer-in- Charge. (Cost of aluminum snap beading shall be paid in basic item): With float glass panes of 8 mm thickness.	81	SQM		

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	Providing and fixing anodised aluminium grill (anodised transparent or dyed to required shade according to IS: 1868 with minimum anodic coating of grade AC 15) of approved design/pattern, with approved standard section and fixed to the existing window frame with C.P. brass/ stainless steel screws @ 200 mm centre to centre, including cutting the grill to proper opening size for fixing and operation of handles and fixing approved anodised aluminium standard section around the opening, all complete as per requirement and direction of Engineer-in-charge. (Only weight of grill to be measured for payment).	QRO	M.T		
	Providing and fixing aluminum tubular handle bar 32 mm outer dia, 3.0 mm thick & 2100 mm long with SS screws etc. complete as per direction of Engineerin-Charge. Anodized (AC 15 ) aluminum tubular handle bar	QRO	EACH		
	Providing and fixing aluminium hanging floor door stopper ISI marked anodised (anodic coating not less than grade AC 10 as per IS : 1868) transparent or dyed to required colour and shade with necessary screws etc. complete. With twin rubber stopper	QRO	EACH		
	Providing and fixing double action hydraulic floor spring of approved brand and manufacture IS : 6315 marked, for doors including cost of cutting floors as required, embedding in floors and cover plates with brass pivot and single piece M.S. sheet outer box with slide plate etc. complete as per the direction of Engineer-in-charge. With Brass cover Plate	QRO	EACH		
	Filling the gap in between aluminium/ stone/wood frame and adjacent RCC/ Brick/ Stone/ wood/ Ceramic/ Gypsum work by providing weather/structural non sag elastomeric PU sealant over backer rod of approved quality as per architectural drawings and direction of Engineer- in-charge complete, complying to ASTM C920, DIN 18540-F & ISO 11600. Upto 20 mm depth and 20 mm width	64	RM		

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	Providing and fixing 12 mm thick pre laminated particle board flat pressed three layer or graded wood particle board conforming to IS: 12823 Grade I Type II, in paneling fixed in aluminum doors, windows shutters and partition frames with C.P. brass / stainless steel screws etc. complete as per architectural drawings and directions of Engineer-inCharge. Pre-laminated particle board with decorative lamination on both sides	12	SQM		
<b>FLOORING</b>					
	Providing & laying first class full body vitrified ceramic tile of make Kajaria/ Restile/Johnson or equivalent of size 600mmx600mmx 9.5mm or approved size of approved colour (matt finish) in flooring using spacer of required size (2mm-4mm) from endura or equivalent over a bed of cement mortar 1:4 of required thickness to match finished floor level mentioned and to match the neighbouring floor finish and jointed with epoxy grout of approved shade from Bal Endura or equivalent brand all complete as directed.(Basic cost of tile - Rs.85/sft).Any difference in basic price and OHP at the time of approval shall be adjusted for the laid area.No extra shall be payable for forming any pattern in the flooring like border, cut tiles,etc.	12	M.SQ		
	Providing and laying 600mm x 600mm or required size from Kajaria/ Restile/Johnson glazed tiles of plain series(Satin finish) in dado set in CM 1:3 with joints so as to form a true & even surface and joints finished neatly with white cement mixed with matching pigments all complete as directed. (Rate should include base plastering with CM 1:5 of required thickness.)	358	M.SQ		
	The rate shall include cost of providing 6mmx6mm groove in the plastering at top of the tile all complete as directed.(Basic cost of tile - Rs.85/sft).Any difference in basic price and OHP at the time of approval shall be adjusted for the laid area.No extra shall be payable for forming any pattern like border, etc.				

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	Providing and fixing 40 mm thick gang saw cut, mirror polished, premoulded and prepolished, machine cut for kitchen platforms, vanity counters, window sills, facias and similar locations of required size, approved shade, colour and texture laid over 20 mm thick base cement mortar 1:4 (1 cement : 4 coarse sand), joints treated with white cement, mixed with matching pigment, epoxy touch ups, including rubbing, curing, moulding and polishing to edges to give high gloss finish etc. complete at all levels. Granite of any colour and shade. Area of slab over 0.50 sqm	3	M.SQ		
<b>MASONRY WORK</b>					
	Half brickwork with locally available best quality table moulded bricks of not less than 50kg/sq.cm crushing strength in CM 1:3 (1 cement 3 sand ) and reinforced with two numbers of 6mm dia. M.S rods at every fourth course embedded in cement mortar 1:4 for partitions.	6	M.SQ		
	In Ground Floor				
<b>PLASTERING</b>					
	Prepare surfaces and plaster with CM 1:5(1cement, 5 sand) ,12mm minimum thick to all interior faces of walls (sponge finish) including RCC surfaces not contiguous to masonry.Necessary internal grooves of size 10mmx10mm shall be carried out as shown/directed by engineer-in-charge.	18	M.SQ		
<b>PAINTING</b>					
	Prepare surfaces and paint two coats of plastic emulsion paint of approved colour over two coats of Gypsum punning of 6 mm minimum thick and primer all complete as per manufacturers specifications to all ceilings in all floors	QRO	M.SQ		
	Finishing with oil bound washable Interior Emulsion of approved brand and manufacture to give an even shade : New work (two or more coats) over and including water thinnable priming coat with cement primer	87	M.SQ		
	Painting wood work with Deluxe Multi Surface Paint of required shade. Two or more coat applied @ 0.90 ltr/10 sqm over an under coat of primer applied @0.75 ltr/10 sqm of approved brand and manufacture	QRO	M.SQ		

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	Painting Steel work with Deluxe Multi Surface Paint to give an even shade. Two or more coat applied @ 0.90 ltr/ 10 sqm over an under coat of primer applied @ 0.80 ltr/ 10 sqm of approved brand and MANUFACTURE	QRO	M.SQ		
	Providing and applying plaster of paris putty of 2 mm thickness over plastered the surface even and smooth complete.surface to prepare	87	M.SQ		
	Removing white or colour wash by scrapping and sand papering and preparing the surface smooth including necessary repairs to scratches etc. complete	87	M.SQ		
	Finishing with Deluxe Multi surface paint system for exteriors using Primer as per manufacturers specifications : Two or more coats applied on walls @ 1.25 ltr/10 sqm	QRO	M.SQ		
<b>DISMANTLING</b>					
	Dismantling plastered brickwalls in cement mortar including cleaning, stacking the useful materials as directed by engineer-in-charge and dumping the dismantled debris as indicated at site, levelling, consolidating, all complete as directed and disposing the debris away from site all complete as directed.	1	M.CUBE		
	Dismantling Aluminium partition including disposing the debris away from site as directed by engineer in charge all complete.	6	M.SQ		
<b>PLUMBING</b>					
	Providing and fixing wash basin with C.I. brackets, 15 mm C.P. brass pillar taps, 32 mm C.P. brass waste of standard pattern, including painting of fittings and brackets, cutting and making good the walls wherever require: White Vitreous China Wash basin size 630x450 mm with a pair of 15 mm C.P. brass pillar taps	3	EACH		
	Providing and fixing Chlorinated Polyvinyl Chloride (CPVC) pipes, having thermal stability for hot & cold water supply including all CPVC plain & brass threaded fittings i/c fixing the pipe with clamps at 1.00 m spacing. This includes jointing of pipes & fittings with one step CPVC solvent cement and the cost of cutting chases and making good the same including testing of joints complete as per direction of Engineer in Charge. Concealed work including cutting chases and making good the walls etc				

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	20 mm nominal outer dia .Pipes	98	RM		
	32 mm nominal outer dia Pipes	98	RM		
	50 mm nominal outer dia Pipes	QRO	RM		
	Providing and fixing PVC Waste pipe for sink or wash basin including PVC waste fittings complete.:Semi rigid pipe 32mm dia	2	EACH		
	Providing and fixing CP Waste coupling for wash basin and sink of approved quality, colour and make. Waste coupling 31mm of 79mm length and 62mm breadth, weighing not less than 45 gms. Make:Hindware,Jaquar etc.,	2	EACH		
	Extra for providing opening of required size & shape for wash basin/ kitchen sink in kitchen platform, vanity counter and similar location in marble/ Granite/stone work, including necessary holes for pillar taps etc. including moulding, rubbing and polishing of cut edges etc. complete.	1	EACH		
	Providing and fixing 600x450 mm beveled edge mirror of superior glass (of approved quality) complete with 6 mm thick hard board ground fixed to wooden cleats with C.P. brass screws and washers complete.	1	EACH		
	Providing and fixing PTMT towel rail complete with brackets fixed to wooden cleats with CP brass screws with concealed fitting arrangement of approved quality and colour. 600mm long towel rail with total length of 645mm, width 78mm and effective height of 88mm, weighing not less than 190 gms	2	EACH		
	Providing and fixing PTMT liquid soap container 109mm wide, 125mm high and 112mm distance from wall of standard shape with bracket of the same materials with snap fittings of approved quality and colour. weighing not less than 105 gms.	2	EACH		
<b>CURTAIN WORK</b>					
	1.Two range of curtain cloth – Type 1 - II.				
	2. Both for doors, windows and partions.				
	3. Assorted colours plain & prints				
	4.Stitched as per site/ size requirement				
	5.Minor modifications in stitching as per site/ size requirement				

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	6.Preferred colour (Brown, Cream, Beige)				
	7.Curtain price (including cloth & curtain rod) to be quoted in Squire metre				
	8.Stitching for each curtain to be absorb in the price of the cloth generally 2 meters.				
	9.Fast colours, water wash				
	10.Fabric density Non Transparent Composition				
	11.Fabric of curtain shall be soft texture, great shading, drape effect and nice doobby.				
	12.The bracket shall be side mounted and front mounted as required				
	13.First rod mount is 3.5 inches from the wall.				
	14.Where curtain used as a partition/ long length, sufficient support from ceiling should be provided to avoid sagging.				
	15.Rate quoted for fully stitched Curtain with top nepha with punch holes after lining bucramreinforced with SS / PVC islets and lower nepha 200mm double turned.				
	Type -I (Surgical Curtain) Curtain fabric weight shall be up to 275-300 ( $\pm 5\%$ ) gsm Composition of fabric shall be polyester yarn I.E. 300 denier fast colour sink age shall be ( $\pm 5\%$ ) Weft and warp shall be polyester / cotton polyester mix	QRO	M.SQ		
	Type - II (Window & Door Curtain) Curtain fabric weight shall be up to 250-275 ( $\pm 5\%$ ) gsm Composition of fabric shall be polyester yarn I.E. 300 denier fast colour sink age shall be ( $\pm 5\%$ ) Weft and warp shall be polyester / cotton polyester mix	QRO	M.SQ		
	Providing and fixing of vertical/roller blinds width 100 mm regular quantity made from 100 % polyster/Fibre yarn coated with fade resistant polymer to ensure complete opaquety with zero light transmittance, having suitable coating on exterior, including all fixtures and fittings complete in all respect as per design and instruction of Engineer in-charge and as per site conditions. The colour will be approved by the competent authority Make-MAC/VISTA/NOVA or any equivalent make.	117	M.SQ		
	Providing and fixing of Single Tap Scrub Station as per the specification as follows	5	Each		

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	1.Deep sloping basin				
	2. One High mount spout/taps with elbow operated flow regulator (length of flow regulator approximately 18-24cms)				
	3. Tap should have provision for manual aeration of water				
	4. 304 stainless steel polished and ground				
	5. Wall Mounted Design with provision for back panel wall bracket fixation				
	6. Provision for Scrub Solution Stand with long handle for pumping				
	7. Sizes				
	a. Width – Approximately 90-100 cms				
	b. Height of Back Panel of sink – 90 -95 cms				
	c. Height of Sink from Ground – 100-110 cms				
	d. Depth of Sink from Top of the Sink – 40-45 cms				
	e. Height of Tap from the top of the sink – 25-28 cms				
	f. Protrusion of Sink from Wall – 45-50 cms				
	Providing and fixing of Two Tap Scrub Station as per the specification as follows	3	Each		
	1. Deep sloping basin				
	2. Two High mount spout/taps with elbow operated flow regulator (length of flow regulator approximately 18-24cms)				
	3. Tap should have provision for manual aeration of water				
	4. 304 stainless steel polished and ground				
	5. Wall Mounted Design with provision for back panel wall bracket fixation				
	6. Provision for Scrub Solution Stand with long handle for pumping				
	7. Sizes				
	a. Width – Approximately 130-140 cms				
	b. Height of Back Panel of sink – 90 -95 cms				
	c. Height of Sink from Ground – 100-110 cms				

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	d. Depth of Sink from Top of the Sink – 40-45 cms				
	e. Height of Tap from the top of the sink – 25-28 cms				
	f. Gap Between two taps – 65- 68 cms				
	g. Protrusion of Sink from Wall – 45-50 cms				
<b>SIGNAGES &amp; FURNITURES</b>					
	Supply and fixing bilingual signage (Hindi & English) or only English. The signage letters will be made with premium quality vinyl sheet of approved colour, pasted on 3mm thick acrylic sheet and 1” studs complete. The floor plans will be fixed on the wall with the help of screws and double tape etc. to give neat & finished look.				
	21”X 4” (84 Sq. inch )	18	EACH		
	Providing and fixing LED (1.2 watt each of reputed make such as M/s Samsung or equivalent,) signage of NIB on flat roof top as per the given sketch including designing & fabrication of mild steel structure for holding the signage. The letter will be made in approved colour with acrylic sheet and waterproof LEDs and outdoor type transformers will be used in the signage. The mild steel structure will be anchored with the brickwork by using anchor bolts etc. so as to withstand high pressure wind/ storm, complete work including s/o a M.S. ladder from lower roof top to signage site roof top for working & future maintenance, s/o all T&P etc. required for proper completion of the work. The design of structural steel will be got checked and signed by a structural engineer before execution of the work.	2	SQM		

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	Providing & Fixing mid back chair .The seat & back are made up of 12mm thick hotpressed plywood, upholstered with fabric & moulded with Polyurethane foam seat and back covers. The back foam should designed with contouredlumbar support for extra comfort .The seat has extra thick foam on front edge to give extra comfort.Mid back size 475 mm Width x 580 mm Height mm. And seat size 470 mm Width x 480 mm Thepolyurethane foam should bemoulded with density = 45 kg/m3 and hardness = 16 +/-2 kg on hampdem machine at 25% compression .Armrest are injection moulded from black copolymer polypropylene. The mechanism should befixed 360 degree revolving type,Upright position locking, tilt tension adjustment, seat back tilting ratio 1:3. The pneumatic height adjustment has an adjustment stroke of 12 cm. The pedestal should be injection moulded in black 33 % glass filled in nylon 66 with 5 nos twin wheel castors. The pedestal should be 66.3 cm pitch- center diameter.	12	EACH		
	Supplying and fixing of Three Seater Waiting Area Visitor Chairs · Non-Magnetic SS perforated sheet seat and back shell made of high quality steel makes it strong and durable. · 1608mm (L)X 695 (H) X 555 (D). Legs and Armrests are made of cold rolled steel and are chrome plated for long life. Armrest and legs are anti rust and anti scratch.	2	EACH		
	Providing and Supplying table of size 1350W x 750 D x 750H, whose work surface is made of 18mm thick. Pre Laminated Particle Board (PLB) All work surface edges are duly sealed with 2mm thick PVC Edge banding. The modesty panel is made of 18mm thick. Pre Laminated Particle Board (PLB) All work surface edges are duly sealed with 2mm thick PVC Edge banding. The rectangular frame is fabricated component in 1.2mm thick CRCA (IS:513), Finish: Powder coated (Epoxy polyester). The leg is Fabricated component in 38mm x25mm x1.2mm thick MS ERW Tube (IS:7138), Finish: Powder coat (Epoxy polyester).The leveler glide for leg is Nylon 6 & MS Bolt. The shell and drawer tray are made of 0.6mm thick CRCA (IS:513), Finish: Powder coat (Epoxy polyester).The drawer front is 0.8mm thick CRCA (IS:513), Finish: Powder coat (Epoxy polyester) and frame assembly is 1.2mm thick CRCA (IS:513), Finish: Powder coat (Epoxy polyester).	6	EACH

	Installation and Commissioning of Automatic Door Providing and fixing of ES 200 Easy 6.25mtr Automatic Sliding system for 12 mm glass. Clear opening:- 2600 mm X 2600 mm, Double Leaf Door. Glass Door Panel weight should not Exist 150Kg. Leaf Door ES200 Easy 6.25 mtr. Automatic Sliding. operator consist of :- Operator profile, Mechanical Components, Electrical. Components, 1200mm Glass Clamping Rail - 2 nos, 2 no's Floor Guide, Program Switch with cable, 1set Light Barrier, Eagle 6 Radar 2 no's, Installation of Moving Panels, S.S Fixture for Light Barrier, U- Channel For fix glass 1 Nos.	2	<i>each</i>		
	Supplying of automatic motorized single leaf sliding door with glass portion made from 12mm frameless toughened glass consisting of all fitting accessories and automation system comprising of single leaf sliding door actuator with built in photocells. Clear opening:- 1200 mm X 2100 mm, A pair of microwave radar and accessories i.e. Electromechanical lock with manual release device. Digital programmer switch, Back up battery, DMCS Software, Central rabbet seal for sliding glass panels all complete including GST, Freight etc. as per instruction of Engineer Incharge and Installation of Automatic motorized double leaf sliding door made of 10 mm thick frame less toughened glass consisting of all fitting accessories (Labour charges)	5	<i>Each</i>		
	Removing and fixing in position of Existing false ceiling in armstrong 600 x 600 x 15/16 mm Dune Supreme RH 99 Prima tile with SILLHOUT Groove type FINE FISSURED RIGHT ANGLE EDGE TILES WITH ARMSTRONG SELECT (WHITE) 15 MM EXPOSED GRID frame work with microlok as specified by Armstrong Co. with suspenders wherever required. Making necessary framework for A.C. ducting, if any and necessary cutouts for diffusers and light fittings, taping and finishing to proper line & level, including making grooves and trap doors for A.C. unit in 18 mm thick M.R. Grade Plywood with Stainless steel hinges & locks with moulding 1" x 1" for edges including finishing with White PlasticEmulsion Paint etc. complete in all respects. (Note:- Only the plan area will be measured for payment. No extra payment will be ,made for cutouts, grooves, mouldings etc.).	288	<i>M.SQ</i>		
	MODULAR CEILING PANELS - 50MM thick & Aluminium Ceiling Grid				

S.No	DESCRIPTION	QTY	UNIT	UNIT RATE IN RS.	TOTAL RATE IN RS.
	Supply installation testing & commissioning (SITC) of the Modular False Ceiling System shall comprise of ceiling panels of double skin type 50mm thick, sandwiched with self extinguishing quality PUF of density not less than 38kg / cum the inner and outer skin shall be of powder coated steel sheet, the thickness of inner skin and outer skin of the panel shall not less than 0.8mm the powder coated steel sheet shall be hot dip galvanized with zinc coating not less than 180gm/sqm both side of the GI sheet used. The false ceiling system shall also include ceiling grid system consisting of T-grid of extruded aluminum anodized surface, wall angle, suspender rod, turnbuckle, nuts, bolts, anchor fasteners etc., as required for fixing the panels, & HEPA filter frame, ceiling grid configuration length and width shall be suitable for fixing ceiling blanks, HEPA module, light fixtures etc. All the suspended material shall be galvanized finish. The ceiling grid system shall be suitable for walkable type false ceiling.the vertical panels to be from false ceiling till the true concrete ceiling. Fire rating - class O and colored approved by HLL. IMPORTANT NOTE: The contractor to take utmost care for tranport,shifting and erecting complete with all necessary hardware, accessories, fittings and fixtures, as per description in individual items, technical specifications, drawings and instructions of the Engineer-Incharge.Note:Necessary cutopens to be made for service outlets and finished after passing the service outlets.	270	MSQ
